STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Storage: Store in a cool, dry area away from heat or flame.

Disposal: Do not re-use empty container. Wrap container and put in trash collection.

Use one canister for each 6,000 cu. ft. of unobstructed area. Example: 30' long x 20' wide x 10' high = 6,000 cu. ft. Use additional units for remote rooms or where free flow of the mist is not assured. Do not use in an area less than 3,000 cu.ft.

PREPARATION: Cover exposed foods, dishes, and food handling equipment. Cover or remove brass or copper articles (lamps, artifacts, headboards, etc.). Open cabinets and doors to areas to be treated. Shut off fans and air conditioners. Put out all open flames except pilot light. Remove pets and cover fish tanks or fish bowls with paper, or remove from area. Close exterior doors and windows.

TO START FOGGING: Place fogger on table, chair or stand, in center of area, at least six feet from pilot light. Place several thicknesses of newspapers under canister to prevent rarring of surface. Hold can at arm's length, with top of can pointing away from face and eyes. Push down on finger pad until it locks - this will start fogging action. Set canister in upright position on table, etc., and leave building at once.

DO NOT RE-ENTER BUILDING FOR TWO HOURS, then open exterior doors and windows and allow to air for one hour before reoccupying area. If additional units are used for remote rooms or where free flow of mist is not assured, increase airing-out time accordingly.
