

Precautionary Statements

Hazards To Humans and Domestic Animals

CAUTION

Harmful if swallowed. Avoid inhalation of vapors. Avoid contact with skin, eyes or clothing. Wash contaminated skin promptly with soap and warm water. For eyes, flush with plenty of water. Get medical attention if irritation persists. Avoid contamination of food and feedstuffs.

Do not use in commercial food processing, preparation, serving or storage areas. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Cover exposed food.

Remove pets, birds and cover fish aquariums before spraying.

STATEMENT OF PRACTICAL TREATMENT

If inhaled: Remove victim to fresh air. Apply respiration, if indicated.

If on skin: Wash off with soap and water. Get medical attention, if irritation persists.

If in eyes: Flush with plenty of water. Get medical attention, if irritation persists.

PHYSICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperature above 130°F may cause bursting.

STORAGE AND DISPOSAL

Storage: Store in a cool dry area away from heat or open flame.

Disposal: Do not reuse empty container. Wrap container and put in trash collection.

QUICK DEATH ROACH & ANT SPRAY

(Propoxur with Synergized Pyrethrins)
See additional insects on right panel

15 DAY KILLING POWER

Fast Acting

Kills crawling insects on contact

Long Lasting—Keeps on killing even after surface is dry

For use in Homes, Apartments, Campers, Boats, Garages, Barns, Kennels, Pet Sleeping Areas and Non-Food Areas of Commercial Buildings, Warehouses, Theaters, Office Buildings, Schools, Motels, Hotels and Restaurants.

ACTIVE INGREDIENTS:

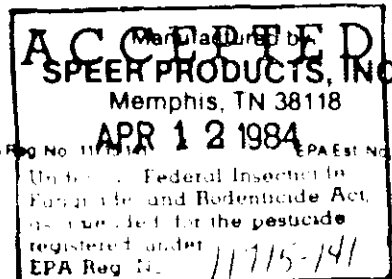

Pyrethrins	0.075%
*Piperonyl butoxide, technical	0.050%
(N-octyl bicycloheptene dicarboximide)	0.083%
2-(1-methylethoxy) phenyl methylcarbamate	0.500%
Petroleum distillate	0.120%
INERT INGREDIENTS	99.222%
Total	100.000%

*Equivalent to .04% (butylcarbityl 6-propyl-piperonyl) ether and .01% related compounds.
TMGK-264, Insecticide Synergist

KEEP OUT OF REACH OF CHILDREN CAUTION

See Additional Precautions on Left Panel

Net wt. oz.

This water-base insecticide has no strong kerosene odor, is non-staining and will not damage carpets, rugs, floors or baseboards.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING. Direct spray away from face. Hold container 10-12 inches from surface and spray at a rate of 1 foot per second or until surfaces are wet. If reinfestation occurs, repeat application as necessary.

FLEAS AND BROWN DOG TICKS: Remove all bedding. Thoroughly spray cracks, crevices, along and behind baseboards, window and door frames, and localized areas of floor and floor coverings where pets normally lie down. Do not spray on pets. Allow the sprayed areas to dry thoroughly. Treat your pet with a registered flea and tick product to control the source of your infestation. Replace bedding before permitting use by animals. For dog kennels, apply to outside runways, window sills and ledges.

ROACHES, WATERBUGS, CRICKETS, AND CENTIPEDES: Thoroughly spray cracks, crevices, baseboards and around garbage containers and other places where insects habitate.

ANTS: Spray ant trails, window frames, door sills and other places where ants may enter. Spray directly on ant hills or on swarming ants outdoors only.

FLIES, MOSQUITOES, GNATS, WASPS: Apply to screens, walls, door and window frames, light fixtures and other outdoor surfaces where insects congregate.

CLOVER MITES, SOWBUGS AND EMBERS: Spray window and door sills and other points of entry—outside only. Apply also to outside foundation and porches to ground level.

SILVERFISH AND FIREBRATS: Apply to cracks, baseboards, behind shelving, bookcases and other storage areas.

PAPER NEST WASPS AND MUD DAUBERS: Thoroughly saturate nest with spray, contacting as many insects as possible. To prevent insects from falling on skin and clothes, do not stand directly under nest. Best results can be obtained if nest is sprayed in late evening when most insects are at rest. If reinfestation occurs, repeat treatment.

SCORPIONS AND SPIDERS: Spray directly on pests when possible. Treat surfaces of out building and garages where pests hide or congregate. Spray points of entry such as window sills and along crevices.
