Dear Mr. Williams:

Subject: Amendment - Update Labeling
EPA Registration No. 11215-157
Your Applications Dated April 27 and June 2, 1988
and June 13, 1989

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided that you make the labeling changes indicated below prior to release for shipment of the product bearing the amended labeling.

1. Change the paragraph "Do not use in commercial food processing . . . etc." to the following:

Do not use in food areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms but excluding areas where foods may be prepared or held. In the home, cover all food handling surfaces and cover or remove all food and cooking utensils, or wash thoroughly after treatment.

Nonfood areas are areas such as garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets, and storage (after canning or bottling).

2. Use in food handling establishments can imply use in U.S. Department of Agriculture (USDA) Meat and Poultry Plants. Therefore, either add the statement "Not for Use in USDA Meat and Poultry Plants," or submit an application to USDA requesting use in these areas. If granted you can then indicate on the label that the product can be used in these areas.
3. Place "Kennels" at the end of the use sites so that "nonfood areas of kennels" is not read.

The product chemistry information is acceptable and has been added to the record for this product.

Submit five (5) copies of your final printed labeling before you release the product for shipment.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch
Registration Division (H7505C)

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

May be harmful if swallowed, inhaled or absorbed through skin. Avoid breathing spray mist and provide adequate ventilation of area being treated. Avoid contact with skin, eyes and clothing. In case of contact immediately flush skin and eyes with plenty of water. Wash thoroughly with soap and water after handling. If poisoning occurs, get prompt medical aid.

Do not use in commercial food processing preparation, food storage or serving areas. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.

Remove pets, birds and cover fish aquariums before spraying. Do not allow children or pets to contact treated surfaces until spray has dried.

PHYSICAL OR CHEMICAL HAZARDS

FLAMMABLE. Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

STORAGE AND DISPOSAL

Storage: Store in a cool dry area away from heat or open flame.

Disposal: Replace cap and discard container in trash. Do not incinerate or puncture.

WORLD CLASS CRAWLING INSECT SPRAY

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

General: Use this Residual Spray as a crack and crevice treatment to control roaches, waterbugs, silverfish, ticks and other insects listed below. Apply product only as a crack and crevice treatment to localized areas where pests are found or may occur. Spray until wet. Repeat as needed. For Spot Treatment.

To Kill Ants, Cockroaches, Crickets, Flies, Spiders, Sowbugs and Carpet Beetles: Spray areas where these pests may hide, including dark corners of rooms and closets, cracks and crevices along baseboards and door and window frames, behind and beneath sinks, refrigerators and cabinets and around base cans, plumbing and other utilities. Pests driven out of hiding should be sprayed directly. For ants and trails, also around doors and windows. Repeat as necessary wherever else these pests may find food.

To Kill Brown Dog Ticks and Fleas: Thoroughly apply as a spot treatment to infested areas such as pet beds and resting quarters. Cracks and crevices, along and behind baseboards, window and door frames and other areas of floor and floor covering where these pests may be present. Old bedding should be removed and replaced with fresh bedding after treatment. Do Not Use on Pets With This Product.

For Crack and Crevice Treatment: To Kill Ants, Cockroaches, Crickets, Flies, Sowbugs, Spiders, Brown Dog Ticks, and Carpet Beetles. Apply small amounts directly into cracks and crevices. Equipment capable of delivering a fine stream should be used in points of entry. Different elements of construction, equipment and floors, openings, ledges and hollow spaces in walls, ceilings and bases where the above listed insects hide.

Care should be taken to avoid depositing product onto exposed surfaces or into the material into the air. Avoid contact of food or food processing surfaces. **Flies and Mosquitoes:** Use only outdoors as an aid in reducing annoyance from insects. Spray outside surfaces of buildings and door frames as well as other areas where these pests may enter the home. At dark corners and localized resting areas as under eaves or porches, patios, etc., where these insects may congregate. Flies and mosquitoes coming to the treated surface will be killed. Repeat treatment when necessary.
