DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product can be used both indoors (attics and other places where nests are built), and outdoors on wasp and hornet nests. Do not use in commercial food/feed handling establishments, restaurants or other areas where food/feed is commercially prepared or processed. Not for use in USDA Meat or Poultry Plants.

To operate, remove protective cap and depress button, being sure to aim spray opening at the location to be sprayed. Direct at wasps, hornets and yellow jackets whenever possible and under eaves, into nests, cracks, holes or crevices wherever insects are noticed. Spray for about 1-2 seconds or until surface is moist from insecticide. To prevent entrance of insects into the house, spray around points where outside plumbing, faucets, etc. enter the house and into cracks or crevices in foundation as well as along sills and ledges.

Kills Wasps, Hornets and Yellow Jackets: This spray is fast acting when insects are hit directly.

With the breeze at your back, thoroughly spray the nest until it is soaked. Allow about 24 hours for those insects which were not directly hit by spray to leave the area. If insects should return to the treated area, spray again. This container delivers a stream type spray, making it possible for the operator to stay back from the places sprayed. This formula utilizes synergist Piperonyl Butoxide, Permethrin and Tetramethrin, a combination specifically effective on this class of insects. It is preferable to apply this product in the evening after all the insects have returned to the nest and are at rest.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
