# SPEER NYLAR®EC

[] or () indicates alternate or optional wording

[Speer Nylar EC] is an insect growth regulator similar to the naturally occurring insect growth hormones which interferes (stops) their growth or development.

[Speer Nylar EC] stops [prevents] the flea and certain listed cockroaches from developing into egg laving adults.

[Speer Nylar EC] can be used as part of an integrated pest management IPM1 program.

[Speer Nylar EC] can be a biorational approach to insect control

[Speer Nylar®EC] keeps working in areas exposed to the sun for up to 14 days.

Inhibits reinfestation by fleas for up to 210 days [30 weeks] 2-[1-Methyl-2-(4-phenoxyphenoxy) ethoxy]

offspring will not become biting [reproductive] adults

Kills preadult [larval] fleas, including eggs for 210 days [30] weeks] [7 months]

Prevents larval fleas from developing into the biting adult

Prevents [stops] hatching fleas [preadult (larval) fleas] [eggs (hatching eggs) (larvae)] from becoming full grown [developing into] biting adults

One treatment works for 210 days [30 weeks] [7 months] against hatching fleas [preadult (larval) fleas] [eggs (hatching) eg: ) (larvae)]

Prevents new (tomorrow's fleas from growing up to bite [Speer Nylar EC] activity keeps working for 210 days [30] weeks] [7 months]

Effective long term control

Controls [stops (kills)(prevents)] stages of fleas that don't resemble adult fleas

Prevents [stops] the emergence of adult fleas

Flea eggs deposited on treated areas will not develop into adult fleas

Larvae crawling onto treated areas will not develop into adult fleas

[Speer Nylar EC] acts on the immature life stage of the flea, preventing it from developing into biting adults Prior to the flea season, previously known infested areas can be pretreated to reduce the developing population Effectively breaks certain listed cockroaches life cycles

[Speer Nylar® EC] keeps working on listed cockroaches for 180 days [26 weeks] [6 months]

Works with nature to interrupt [break] the life cycle of listed cockroaches

Inhibits reinfestation by listed cockroaches for up to 180 days [26 weeks] [6 months]

Effectively controls [eliminates] listed cockroach populatio; by preventing reproduction [thereby eliminating future generational

Prevents [stops] [inhibits] listed nymphal cockroaches from becoming adults [breeding adults] [reproductive adults] [egg. Do not use or store near heat or open flame. laving adults!

One treatment stops listed cockroaches from generating reproductive offspring for [180 days] [26 weeks] [6 months]
