# SPEER D-TRANS® RESIDUAL SPRAY WITH NYLAR\*

[] or () indicates alternate or optional wording

[Speer D-TRANS® Residual Spray with Nylar®] is an insect growth regulator similar to the naturally occurring insect Kills [controls] existing cockroaches and effectively breaks attention if irritation persists. growth hormones which interferes [stops] their growth or development.

[prevents] the flea and cockroach from developing into egg laying adults.

as part of an integrated pest management (IPM) program.

[Speer D-TRANS® Residual Spray with Nylar®] can be a biorational approach to insect control.

working in areas exposed to the sun.

[7 months]

Kills adult and preadult fleas, including flea eggs for 210 days [30 weeks] [7 months]

offspring will not become biting (reproductive) adults Prevents larval fleas from developing into the biting adult Effective long term [residual] control

Prevents [stops] hatching fleas [preadult (larval) fleas] [eggs ACTIVE INGREDIENTS: (hatching eggs) (larvae)] from becoming full grown d-trans allethrin. [developing into] biting adults

One treatment works for 210 days [30 weeks] [7 months] against hatching fleas [preadult (larval) fleast leggs (hatching) eggs) (larvae)

Kills present (today's) fleas and prevents new (tomorrow's) flens from growing up to bite.

[Speer D-TRANS® Residual Spray with Nylar®] activity keeps working on fleas for 210 days [30 weeks] [7 months] Controls (stops (kills)) prevents) I stages of fleas that don't look like adult fleas

Prevents [stops] the emergence of adult fleas

Flea eggs deposited on treated areas will not develop into adult fleas

Larvae crawling onto treated areas will not develop into adult

[Speer D-TRANS® Residual Spray with Nylar®] acts on the immature life stage of the flea, preventing it from developing

into biting adults

Effective long term control

Inhibits reinfestation by cockroaches for up to 180 days [26] weeksl [6 months]

the cockroach life cycle

[Speer D-TRANS® Residual Spray with Nylar®] stops roach effectively controls [eliminates] cockroach populations by preventing reproduction [thereby eliminating future generations

[Speer D-TRANS\* Residual Spray with Nylar\*] can be used [Speer D-TRANS\* Residual Spray with Nylar\*] stops cockroaches from generating reproductive offspring for 180 days [26 weeks] [6 months]

Prevents [stops][inhibits] nymphal cockroaches from Harmful if swallowed or absorbed through skin. Contains

Inhibits reinfestation by fleas for up to 210 days [30 weeks] 180 days [26weeks] [6 months] against hatching cockroaches [nymphall (preadult) cockroaches] [hatching eggs (nymphs)]

Kills Ticks, Spiders, Ants, and other listed insects

### DIRECTIONS FOR USE

liquid. Do not apply as a broadcast treatment. Avoid excessively wetting furniture and carpeting.

FLEA AND TICK CONTROL:

furniture. Apply as a spot application to rugs and carpets this application and prior to re-entry. Repeat as necessary. where fleas and ticks are seen and to areas used by pets as a resting place. Spot treat under and around furniture if pets. FOR COCKROACH CONTROL: frequently rest in these areas. Avoid excessively wetting Cockrouches [adults (nymplis)] [Smokey Brown Cockrouch, upholstered furniture and draperies. A fine spray applied Brown Banded Cockroach, Asian Cockroach, German uniformly is all that is necessary to kill fleas. To kill ticks Cockroach, American Cockroach, Australian cockroach, and other labeled insects, apply directly to pests. Do not Oriental Cockroach Waterbugs, Palmetto Bugs: allow children or pets to walk on treated surfaces until completely dry. Do not spray on pets or humans.

FOR USE IN VEHICLES: If flea infested animals are transported in vehicles, use as directed above to control the intestation.

For best results, to protect your pet against and to minimize reintroduction of adult fleas from outdoors, use EPA registered flea and tick products, [such as][brand name] flea or flen and tick collar, [brand name] pet powder, [brand name) pot spray, [brand name] pot dip, [brand name] pet shampoo, flea shampoo or tlea and tick pet shampool, in conjunction with this application and prior to resontry. Repeat as necessary.

[Use [Speer D-TRANS® Residual Spray with Nylar®] with (brand name) for particularly heavy flea infestations. As part of a complete flea control program use EPA registered (brand name] outdoor [lawn] [home and garden] spray, [brand name] pressurized flea and tick [indoor] [premise] spray.]

FOR USE IN PET AREA: Spot treat pet bedding and other pet resting places as these are primary hiding areas for fleas and ticks. No need to remove pet bedding after treatment. To reduce infestation, spray around sleeping area, around baseboards, window and door frames, wall cracks, local areas of floors and other resting places until the surface is slightly moist. Also spray the entire inside surface of dog houses and kennels. Do not allow pets to use treated areas until completely dry. Repeat as necessary.

FOR SURFACE AND CARPET SPRAY: Prior to reintroduction of adult fleas from outdoors, use EPA the outside of baseboards, door sills, frames and floors, application, thoroughly vacuum all carpeting, upholstered registered flea and tick products, Ibrand namel flea or flea around and on drains, pipes, plumbing, behind bookcases, furniture, along baseboards, under furniture and in closets, and tick collar, Ibrand namel pet powder, Ibrand namel pet storage and other utility installation areas, contacting insects Put vacuum bag into a sack and dispose of in outside trash, spray, [brand name] pet dip, [brand name] pet shampoo, flea with spray whenever possible. Repeat as necessary. Apply as a spot treatment to draperies and upholstered shampoo or flea and tick pet shampoo, in conjunction with

ICRACK AND CREVICE SPRAY: Apply spray in small amounts directly into cracks and crevices. Special attention should be paid to areas such as behind baseboards, connection areas around drains, pipes, behind and beneath sinks, stoves, plumbing and other visible cracks and crevices. Sprny those areas thoroughly being certain that spray penetrates well. Retreat 30 days after first application. Care should be taken to avoid depositing this product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food handling surfaces.]

ICONTACT APPLICATION: Contact as many insects as possible with this spear in addition to spot spraying thel parts of the room suspected of harboring these pests. Special attention should be paid to hiding places such as beneath sinks, behind and beneath stoves and refrigerators, around garbage cans, cabinets, along the outside of baseboards, door sills, frames and floors, around and on drains, pipes, plumbing, behind bookcases, storage and other utility installation areas, contacting insects with spray whenever possible. Retreat 30 days after first application.

[brand name] for particularly heavy roach infestations.

Pillbugs, Earwigs, Clover, Mites, Lice, and Millipedes: dried. Repeat as necessary. Contact as meny insects as possible, with this spray in addition to spet spraying of the parts of the room-suspected OUTDOOR APPLICATION: of harboring these pests. Special attention should be paid to hiding places such as beneath sinks, behind and beneath

For best results, to protect your pet against and to minimize stoves and refrigerators, around garbage cans, cabinets, along

EXPOSED STAGES of Flour Beetles, Cadelles, Rice Weevils, Flat Grain Beetles, Cigarette Beetle, Confused Flour Beetle, Drugstore Beetle, Lesser Grain Borer, Merchant Grain Beetle, Saw-toothed Grain Beetle, Grain Weevils, Warehouse Beetle, Red Flour Beetle, Grain Mites, Cheesemites and Indian Mealworm. Find and dispose of infested packaged goods. Remove all other items from pantry, shelves and drawers and clean thoroughly. Spray into cracks and crevices, shelves, drawers and cabinets and other areas where these insects tend to congregate. Place clean paper on the shelves and return packages after the spray has dried. Repeat as necessary.

ANTS, foraging Pharnob Ants, Carpenter Ants Hastern (Western)]: Treat doors, around window frames, and trails and other areas of entry. Spray on ants where possible. Repeat as necessary.

CARPIT BEFFLES (Dermentida (Trogoderma)): Directly spray as many insects as possible. Spot spray surfaces of upholstered furniture, under cushions, crevices, etc. Where possible, spot treat the bottom of rigs and carpets, under furniture and in corners. Apply as a spot application to rugs and carpets in areas such as under furniture, corners of rooms, and areas not subject to foot traffic, as these are where carpet beetle larvae are commonly found. Also treat shelves, closets, areas under furniture, floors, walls, window sills, baseboards and wherever these insects are seen or suspected. Repeat as necessary.

CLOTHES MOTHS: Remove any infested articles from Use [Speer D-TRANS® Residual Spray with Nylar®] with storage, brush thoroughly, and air for several hours in sunlight, if possible. Apply liberally to empty chests, closets, bureaus and other storage areas where these pests are FOR CONTROL OF Crickets, firebrat, silverfish, Booklice, suspected, directing the spray into cracks, joints, and Dust Mites, Scorpions, Spiders, Centipedes, Sowbugs, crevices. Return clean articles after spray has thoroughly

Caution should be taken to avoid spraying when wind conditions could create a mist to blow back to applicator. Do not apply this product in or around bodies of water. Do not spray directly on plants. Spray the surface areas and contact as many insects as possible.

ANTS, Foraging Pharaoh Ants, Carpenter Ants [Eastern (Western)]: Spray ant trails, ant hills, ant mounds and other areas of entry and infestation. Spray on ants where possible.

SPIDERS: Spray directly on spiders and webs. Repeut as necessary.

SOWBUGS, Millipedes, Beetles, Ground Beetles, Elm Leaf Beetle, Boxelder Bug, Earwigs, Pillbugs, Clover Mites, Centipedes, Scorpions, Cockroaches, Crickets, Palmetto Bugs, Waterbugs: Spray surfaces and hiding places thoroughly, such as cracks, crevices, moist areas, openings around pipes, spigots, storage areas, sheds and other areas where these pests tend to congregate. Repeat as necessary.

FLIES, Mosquitoes, Gnats, Flying Moths, Midges and other flying insects: Use only outdoors as an aid in reducing annoyance from these insects. Spray outside surfaces of window and door frames as well as other areas where these pests may enter the house. Also spray dark corners and localized resting areas such as under eaves, porches, patios, garages, garbage can areas and other areas where these insects may congregate. Flying insects coming to rest on treated surfaces will be killed. Repeat as necessary.

# STORAGE AND DISPOSAL

**STORAGE:** Store in a cool dry area away from heat or open flame.

**<u>DISPOSAL</u>**: Replace cap and discard container in trash. Do not incinerate or puncture.
