- ACTIVE INGREDIENTS:**
- Sodium Carbonate 3.0%
 - n - Alkyl (C₁₂ (50%), C₁₄ (30%), C₁₆ (17%), C₁₈ (3%))
dimethyl ethyl benzyl ammonium chlorides 1.6%
 - n - Alkyl (C₁₄ (60%), C₁₆ (30%), C₁₂ (5%), C₁₈ (5%))
dimethyl benzyl ammonium chlorides 1.6%
 - Ethanol 0.8%
- INERT INGREDIENTS:**
(includes compatible surfactants and builders)..... 93.0%

DISINFECTANT CLEANER

CAUTION: Harmful if swallowed. Do not take internally. Avoid contact with skin and eyes. Should accidental contact with eyes occur, flush immediately with plenty of water and get immediate medical attention.

DIRECTIONS

For cleaning and disinfecting in normal maintenance operations, use at least 2 ounces of Disinfectant Cleaner per gallon of water. This minimum concentration will be effective for floors, walls and other hard surfaces in schools, hospitals, industrial areas, public rooms, and innumerable other areas.

In certain areas where surfaces are contaminated with heavy amounts of soil and/or organic matter, use 4 ounces of Simoniz Disinfectant Cleaner per gallon of water. For maximum protection, application of the heavier concentration twice will insure maximum cleaning and disinfecting.

In all cases, where germicidal and cleaning action is desired, surfaces being cleaned should be wet thoroughly.

- Phenol Coefficients: (A.O.A.C. at 20°C)
- Salmonella Typhosa - 19
- Staphylococcus Aureus - 27

Passes A.O.A.C. Use dilution Confirmation Test at 2 ounces per gallon of water.

DESCRIPTION

Simoniz Disinfectant Cleaner is recommended for use in cleaning, disinfecting and deodorizing hard surfaces such as floors, walls, equipment and fixtures in public institutions and industrial buildings. Now in one operation both cleaning and general premise disinfecting can be accomplished quickly and easily.

Simoniz Disinfectant Cleaner should not be mixed with soaps or other detergent solutions since such mixing may adversely affect cleaning and disinfecting characteristics of the product.
