U.S. ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (75-767) WASHINGTON, DC 20460  <b>NOTICE OF PESTICIDE:</b> <input type="checkbox"/> REGISTRATION <input checked="" type="checkbox"/> REREGISTRATION  <i>(Under the Federal Insecticide, Fungicide,          and Rodenticide Act, as amended)</i>	EPA REGISTRATION NO. 11736-20001	DATE OF ISSUANCE <b>AUG 17 1995</b>
	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT  <p style="text-align: center;">Sparkle</p>	

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Colonial Chemical Co.  
 78 Carranza Road  
 Tabernacle, NJ 08088

**NOTE:** Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

- a. Delete the phrase "or burying in an approved landfill".

A stamped copy of the product label is enclosed for your records. Submit one copy of the final printed label before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Ruth G. Douglas  
 Product Manager (32)  
 Antimicrobial Program Branch  
 Registration Division (7505C)

## DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Swimming pool water should contain proper amounts of chlorine to kill bacteria and to prevent the formation of algae and cloudy water.

### INITIAL TREATMENT

Check the pH and adjust if necessary to 7.2-7.8. With the pump and filter on, add 2 gallons of Sparkle for each 10,000 gallons of pool water. Thereafter test for chlorine daily with a reliable chlorine test kit. Using the guide below, increase or decrease dosage to maintain 0.6 to 1.0 ppm (parts per million) of available chlorine. Consult your pool chemical supplier for additional information.

### FOR DAILY CHLORINATION

Add 1 or more quarts of Sparkle per 10,000 gallons of pool water to obtain a chlorine residual of .6 to 1.0 ppm (1.5 to 2.0 for stabilized pools).

### FOR SHOCK TREATMENT

Add 6 or more quarts of Sparkle per 10,000 gallons of pool water to obtain a chlorine residual of 3.0 to 6.0 ppm.

When you superchlorinate or shock treat, add Sparkle in the evening. Allow pool to stand unused overnight and check chlorine level with a test kit the next day. If chlorine level is too high (over 3.0 ppm), let pool stand unused until the chlorine drops to below 3.0 ppm.

Shock treatment will rapidly increase the level of chlorine in pool water. The resulting high chlorine level works against bacteria, algae, odors and eye burn due to the presence of chloramines (nitrogen compounds which combine with chlorine).

Shock treatment restores the ability of your regular chlorine treatment to handle algae and bacteria.

### STORAGE AND DISPOSAL

Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landfill. Product or rinsate that cannot be used should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal, or cleaning of equipment.

## SODIUM HYPOCHLORITE SOLUTION

Active ingredient:

Sodium Hypochlorite . . . . . 12.5%

Inert ingredients . . . . . 87.5%

Degrades with age. Use a test kit and increase dosage as necessary to obtain required level of available chlorine. See Directions on Right Panel.

### STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

If on skin, wash with plenty of soap and water. If in the eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of water. DO NOT induce vomiting. Call a physician or Poison Control Center immediately.

KEEP OUT OF REACH OF CHILDREN  
**DANGER**

SEE SIDE PANEL FOR ADDITIONAL  
PRECAUTIONARY STATEMENTS

NET CONTENTS: 5 GALLONS

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND  
DOMESTIC ANIMALS**

**DANGER**

Corrosive, may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

**ENVIRONMENTAL HAZARDS**

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS  
STRONG OXIDIZING AGENT**

Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids, detergents or other chemicals will release hazardous gases irritating to eyes, lungs and mucous membranes.

This product is a strong bleaching agent. Do not spill on clothing, carpet or other fabric. If accidentally spilled, rinse immediately with plenty of water. Do not reuse this container. Do not transfer contents to any metal container for storage.

ACCEPTED  
with COMMENTS  
in EPA Letter Dated:

**AUG 17 1995**

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act as  
amended, for the pesticide  
registered under EPA Reg. No. 117

**Sodium Hypochlorite Solution**

**UN 1791**

## DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

### DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

Clean equipment in the normal manner. Just before using, rinse all surfaces with this Sodium Hypochlorite Solution containing 200 ppm available chlorine. Maintain contact with the sanitizer for a minimum of 2 minutes. Do not rinse with water after treatment with Sodium Hypochlorite Solution. Do not soak overnight. Addition of one fluid oz. (2 tablespoons) of this Sodium Hypochlorite Solution per 5 gallons of water will provide approximately 200 ppm available chlorine by weight. When used as sanitizing for non-porous surfaces such as dishes, glasses, and utensils, clean prior to applying a 200 ppm available chlorine solution.

### DISINFECTANT

For disinfection of hard, inanimate surfaces such as floors, walls, and woodwork, add 3 oz. of product to 5 gallon water for 600 ppm available CL<sub>2</sub>. Thoroughly wet surfaces with the recommended solution for at least 10 minutes. Do not rinse after treatment.

### DIRECTIONS FOR DISINFECTION OF POTABLE WATER

Dilute this sodium hypochlorite solution in the ratio of one part sodium hypochlorite solution to 11 parts softened water. Mix sodium hypochlorite solution with water thoroughly and begin feeding of solution with hypochlorinator (metering pump). Maintain a free available chlorine residual of at least 0.2 ppm and no more than 0.6 ppm throughout the distribution system, as determined by a DPD chlorine test kit. Bacteriological sampling must be conducted at a frequency no less than that prescribed by the National Interim Primary Drinking Water Regulations. \*Check water frequently with a DPD chlorine test kit.

\*Contact your local Health Department for further details.
