

Cross-infection is of major housekeeping concern not only in hospitals, but in schools, institutions, and industry. Ultra-San Concentrate is formulated for this problem area. It both cleans and disinfects effectively and is virucidal when used as directed. Its hard surface disinfecting action will reduce the hazard of cross-infection from environmental surfaces.

When used as directed, Ultra-San Concentrate will deodorize toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas, and other places where bacterial growth can cause mal odors.

This product is economical to use because it is highly concentrated and should be handled with care.
