UNDER THE FEDERAL INSECTICIDE  
FUNGICIDE AND RODENTICIDE ACT  
FOR ECONOMIC POISON REGISTER-  
ED UNDER NO. 11742-1

Directions For Use: This product aids in the control of bacteriological slime growths in paper and paper pulp process systems. This product should be added to the white water, fresh water, or pulp stock at the rate of 1.0-2.0 pounds per ton of paper or pulp produced. The rate of feed is dependent upon the type of system and the severity of the problem.

BACTROL 39 weighs 10.5 pounds at 70 degrees F. A small variable speed proportioning pump may be used to control the addition rate of BACTROL 39 to the system. Rinse empty container thoroughly with water and discard it.

For industrial use only.

Use only as directed.

## DANGER

This material is toxic—causes skin irritation or eye damage. Do not get in eyes, on skin, or on clothing. In case clothing is contacted with BACTROL 39, wash garments immediately with water to avoid danger of fire. Avoid inhalation. Wear neoprene protective gloves and safety goggles when handling. In case of contact, flush with plenty of water; for eyes, in addition, get medical treatment.

## DO NOT TAKE INTERNALLY!

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, large quantities of water. Avoid alcohol. Take patient immediately to hospital or physician.

Keep drum covered when not in use. Store away from heat and fire. Avoid contact with acids, organic matter and materials containing sulfur; sweep up spills and cover with water or earth.

Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water.
