

GENERAL USE DIRECTIONS

Add one ounce per gallon of water. Use SANI-RINSE for sanitizing and cleaning equipment and utensils in food processing, dairy industry, bars, restaurants, institutional kitchens, farms and wherever sanitizing may be desirable. No rinse is required.

For heavily soiled equipment or utensils, pre-wash with a good detergent. Rinse with clean water. Then apply recommended dilution of SANI-RINSE.

DIRECTIONS FOR RESTAURANT AND BAR RINSE:

Dishes, glassware, silverware, cooking utensils, wash with detergent, rinse thoroughly, and immerse in a solution containing 1 oz. of SANI-RINSE to 1 gallon of water (200 ppm). No rinse is required.

DIRECTIONS FOR FOOD PROCESSING EQUIPMENT AND DAIRIES:

Clean and rinse equipment thoroughly, then apply sanitizing solution containing 1 oz. of SANI-RINSE to 1 gallon of water (200 ppm). No rinse is required.

WISCONSIN STATE BOARD OF HEALTH

DIRECTIONS FOR EATING ESTABLISHMENTS

1. Scrape and pre-wash utensils and glasses whenever possible.
2. Wash with a good detergent or compatible cleaner.
3. Rinse with clean water.
4. Sanitize in a solution of 1 oz. of SANI-RINSE to 1 gallon of water (200 ppm active quaternary). Immerse all utensils for at least two minutes or for contact time specified by governing sanitary code.
5. Place sanitized utensils on a rack or drain board to air-dry.

SANI-RINSE is recommended wherever the maintenance of sanitary, clean conditions are indicated.

Sanitizing Effectiveness: SANI-RINSE is effective in waters up to 750 ppm hardness. This activity has been confirmed by the Germicidal and Detergent Sanitizers Method ("The Chambers Method"); Methods of Analyses, AOAC, Eleventh Edition 1970, Page 66 as follows:

Escherichia coli ATCC No. 11229 at 200 ppm

Active quaternary — 750 ppm CaCO_3

Staphylococcus aureus ATCC No. 6538 at 200 ppm active quaternary — 750 ppm CaCO_3

SANI-RINSE contains a nonionic wetting agent to promote rinsing this assuring film-free, spot-free equipment and utensils.

NOTE: Do not mix with soap or anionic detergents. Do Not Reuse Container. Rinse empty container thoroughly with water before discarding.

WARNING

KEEP OUT OF REACH OF CHILDREN. Causes eye or skin irritation. Do not get in eyes, on skin, or on clothing. Harmful if swallowed. Avoid contamination of food.

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of water. Avoid alcohol. Call a physician immediately.

VULCAN #89 ALGAEICIDE

Concentrated Algaecide for industrial re-circulating water cooling towers. Helps keep water cooling tower systems clear and free of visible algae slimes.

ACTIVE INGREDIENTS

Percent by Weight

n-Alkyl (60% C₁₄, 30% C₁₆, 5% C₁₂, 5% C₁₈)
dimethyl benzyl ammonium chloride 5%
n-Alkyl (68% C₁₂, 32% C₁₄) dimethyl ethylbenzyl
ammonium chlorides 5%

INERT INGREDIENTS: 90%
100%

ACCEPTED

KEEP OUT OF REACH OF CHILDREN

DANGER: Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.
Rinse empty container thoroughly with water and discard.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

Vulcan #89 Algaecide is compatible with virtually all corrosion inhibition additives, but should not be used in the presence of soap or other anionic detergents. Vulcan #89 Algaecide at use dilution is non-corrosive to inanimate hard surfaces.

Directions for Use: Apply Vulcan #89 Algaecide when the system is in jeopardy of becoming affected or after cleaning system whose efficiency is already impaired.

Initial Dose: 1-2 gallons Vulcan #89 Algaecide to each 5,000 gallons of water contained in the system (20-40 ppm active quaternaries). Repeat until control is evident.

Periodic Dose: When system is in control, add 1-3 quarts Vulcan #89 Algaecide to each 5,000 gallons of water (5-15 ppm active quaternaries) contained in the system every 7 days or sooner should visible growth appear.

For best results, clean heavily contaminated systems before treatment with this product. If soap or anionic detergent is used, rinse thoroughly before charging with Vulcan #89 Algaecide. Apply Vulcan #89 Algaecide at a point in the system where uniform mixing will take place.

Fish and/or Wildlife Precautions: This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Apply this product only as specified on this label. Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies.
