NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
 - a. Add the phrase "EPA Registration No. 11746-34."
 - b. Change "Servicepersons" to "Pest Control Operators or Commercial Applicators."
 - c. Delete "Resistant" in "Kills Resistant Cockroaches." You may retain that claim provided you have the resistance, e.g., dichlorvos resistant, and support such claim with appropriate data.
 - d. Delete Xylene range aromatic solvent and Petroleum distillate from the ingredient statement. Include this in the total percentage of inert ingredients since these components are solvents in the formulation.

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL _____ DATE _____

- e. Place an asterisk after **INERT INGREDIENTS*** and add a footnote **"*Contains xylene range aromatic solvent."**
- f. Change **"See rear panel, etc."** to **"See rear panel for additional precautionary statements."**
- g. Place a zero before the decimal point in **".9429."**
- h. The **Pesticide Disposal** statement should read **"Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility."** The **Container Disposal** statement should read **"Triple rinse (or equivalent). Then dispose of in a sanitary landfill or by other approved State and local procedures."**
- i. Revise:

Note to Physician

Solvent presents aspiration hazard. Gastric lavage is indicated if material was taken internally. Diazinon is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

- j. Change **"Do not apply directly to lakes, streams, or ponds. Do not contaminate water by disposal of wastes"** to **"Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters."**
 - k. Delete **"this product must not be used on golf courses and sod farms"** since the application sites (including fire ant mound treatment) appearing on the label do not trigger this prohibition.
 - l. Use in food handling establishments can imply use in U.S. Department of Agriculture (USDA) Meat and Poultry Plants. Therefore, either add the statement **"Not for Use in USDA Meat and Poultry Plants,"** or submit an application to USDA requesting use in these areas. If granted, you can then indicate on the label that the product can be used in these areas.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

For shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

IN FOOD HANDLING ESTABLISHMENTS

APPLICATION OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS OTHER THAN AS A SPOT AND/OR CRACK AND CREVICE TREATMENT IS NOT PERMITTED.

mfg. by

LOUISIANA CHEMICAL COMPANY
Baton Rouge, Louisiana 70815

EPA REG. NO. 11746-XX

EPA EST. NO. 11746-LA-1

Application Within Food Handling Establishments: residences in which exposed food is held, including, but not limited to, areas for receiving, bottling, wrapping, boxing), preparing food, enclosed processing systems (mills, dairies, etc.) areas (when food is exposed and facility is closed for crevice treatment in and around both food and equipment. Kills cockroaches, crickets, silverfish, spiders, etc. Apply directly into cracks and crevices, delivering a pin stream of insecticide, in position of construction, between equipment and floor, hollow spaces in walls, equipment legs and conduits, motor housings and junction or switch boxes, to floor surfaces where pests have been seen hiding. Limit individual spot treatments to a maximum of 100 sq. ft. per floor surface. Individual spot treatment should be made immediately. Take extreme care that the product is not in contact with food or other items. Avoid contamination of food and food processing equipment.

Application Within Food Serving Areas (factories, etc.) such as dining rooms, but excluding areas where food is held:

Apply as a spot treatment to selective surfaces, elements of construction and into cracks and crevices likely to be contacted by food (Do not apply to exposed foods are exposed.)

LOCATIONS OTHER THAN COMMERCIAL

PESTS INDOORS: General Information

Use this product as a spot treatment (unit) to control cockroaches, ants, crickets, firebrats, brown dog ticks in and around residential and commercial buildings including homes, apartments, manufacturing plants and warehouses. Refer to label for details.

To Control carpet beetles:

Spray edges of carpeting and under carpeting to the floor and baseboards. Spray and to infested areas of closets and shelves. Reinfestation occurs.

To Kill fleas and brown dog ticks, indoors:

Clean premises thoroughly before treatment. Spray, treat the entire floor and carpet area, to cracks, crevices and under carpet and in sleeping quarters, closets, upholstered furniture (seams), beds, under sofas and other furniture. Bedding should be cleaned or replaced with application in nurseries or any area where children play. Apply 1 gallon to 750 square feet. Avoid reinfestation, pets must be treated with approved insecticide labeled for use on animals, repeated as necessary. Humans and pets should avoid contact with treated surfaces (rugs, upholstered furniture, etc.)

As an aid in reducing the annoyance of flying moths:

Spray outdoor surfaces of screens, window frames, other areas where these pests may enter the building. Resting places including porch ceilings and eaves when effectiveness diminishes.

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 11746-34
