3. CIODRIN Insecticide is a specially prepared ready to use livestock dusting powder suitable for use in conventional hand and power dusters and dust bags. No withdrawal is necessary when used on meat animals. 3. CIODRIN is approved for lactating dairy animals. Do not treat calves under 6 months of age. Brahman cattle should not be treated as they may show hypersensitivity to organic phosphates.

**USE DIRECTIONS**

**DAIRY AND BEEF CATTLE.** To control horn flies, apply 1/2 heaping tablespoons (1.2 oz.) to the backline, poll, neck and upper portions of the sides. For lice, apply thoroughly by rubbing the dust into the hair. Repeat in 14 days for horn flies and 14 weeks for lice, if necessary. For aid in controlling face flies, apply dust lightly, but thoroughly, to the face and neck areas as required.

**SWINE.** To control lice, apply 1/2 oz. as thoroughly as possible with attention to the neck and around the ears. Repeat in 14 weeks if necessary.

**DUST BAG - ANIMAL DUSTING STATION**

**DAIRY AND BEEF CATTLE.** For control of horn flies and as an aid in the control of lice and face flies, 3% CIODRIN Insecticide Dust may be applied daily when application is made with dust bags. To prepare dust bags for animal use, place 18 pounds of dust in double burlap bags. Suspend bags near mineral or salt blocks in alleyways leading to and from animal buildings or dairy barns. Dust bags may also be suspended in livestock holding pens, feed lots and loafing sheds. Protect bags from weather by placing them under shelter.
