GENERAL CLASSIFICATION**

**IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT
IN A MANNER INCONSISTENT WITH ITS LABELING.**

DIRECTIONS FOR SWIMMING POOL CHLORINATION
1. Before using, check the chlorine test kit for accuracy. The test kit should be used to determine the chlorine level in the pool water. The test kit should be used to determine the chlorine level in the pool water. The test kit should be used to determine the chlorine level in the pool water. The test kit should be used to determine the chlorine level in the pool water.

A. Adjust the water level to the 12 range and maintain.
B. Add one gallon of this solution to each 10,000 gallons of water in the pool. Repeat this procedure until the chlorine level is between 1.0 and 1.5 ppm. Retest the water every 24 hours. If the chlorine level is below 1.0 ppm, add more solution. If the chlorine level is above 1.5 ppm, do not add more solution. The chlorine level should be maintained between 1.0 and 1.5 ppm.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
FOR HOME WELL WATER SYSTEMS**
1. Turn off the water supply to the well. Add one gallon of this solution to each 100 gallons of water in the well. Retest the water after 24 hours. If the chlorine level is below 0.5 ppm, add more solution. If the chlorine level is above 0.5 ppm, do not add more solution. The chlorine level should be maintained between 0.5 and 1.0 ppm.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT
1. Wash the equipment with water. Add one gallon of this solution to each 100 gallons of water. Retest the water after 24 hours. If the chlorine level is below 100 ppm, add more solution. If the chlorine level is above 100 ppm, do not add more solution. The chlorine level should be maintained between 100 and 200 ppm.

NOTE: This product should not be used on aluminum, brass, or other metals. It may cause discoloration or damage to these materials. It should not be used on painted surfaces or fabrics. It should not be used on marble or stone. It should not be used on wood. It should not be used on concrete. It should not be used on asphalt. It should not be used on rubber. It should not be used on plastic. It should not be used on glass. It should not be used on metal. It should not be used on wood. It should not be used on concrete. It should not be used on asphalt. It should not be used on rubber. It should not be used on plastic. It should not be used on glass. It should not be used on metal.

STORAGE AND DISPOSAL:
Store in a cool, dry place. Do not store near heat, fire, or open flame. Do not store near food, feed, or fertilizer. Do not store near children or pets. Do not store near swimming pools. Do not store near water. Do not store near air conditioning units. Do not store near electrical equipment. Do not store near power lines. Do not store near gas lines. Do not store near oil. Do not store near gasoline. Do not store near kerosene. Do not store near alcohol. Do not store near acetone. Do not store near benzene. Do not store near toluene. Do not store near xylene. Do not store near ethylene glycol. Do not store near propylene glycol. Do not store near glycerol. Do not store near stearic acid. Do not store near palmitic acid. Do not store near myristic acid. Do not store near lauric acid. Do not store near myristoleic acid. Do not store near lauroleic acid. Do not store near myristic acid. Do not store near lauric acid. Do not store near myristoleic acid. Do not store near lauroleic acid.
