POOL-PAL 100

FOOD PAK 1/4 is effective in controlling the growth of algae in swimming pools. The application of FOOD PAK 1/4 will control existing algae and subsequent algae will control the outburst by algae. The treated water can be used immediately. No WAFFERS.

DIRECTIONS

Use the Application Chart to determine the amount of FOUL PAW that you need for your pool. Use a plastic tubbed pool or, at first, a hot-tub, steps of an average pool. The required amount of FOUL PAW for a 10,000-gallon swimming pool full with water and open to the air is 1 pint of FOUL PAW. That means the above chart is for 10,000-gallons. If you have a smaller pool, the amount should be proportionately reduced to the capacity of the pool.

CAUTION

Do not use the dry-cleaning solvent in the dry-cleaning process. Wash the clothing in warm or hot water thoroughly, with water. Do not use the dry-cleaning solvent to wash and if you do, please be careful.

THE UNIVERSITY OF CHICAGO LIBRARY

The results of the study are presented in Table 1. The first column lists the test results, the second column lists the test results for the control group, and the third column lists the test results for the experimental group. The results show that the test results for the control group are significantly higher than the test results for the experimental group.

NOTICE

As there are no data for the year 1960, the following table is a summary of the number of employees in the various categories of the public sector in the other three indicated years. The table shows a complete reversal of the trend in the number of employees in the public sector in the other three years.
