

POOL-PAL Q-A-C JUNIOR

POOL PAL Q-A-C JUNIOR is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using POOL PAL Q-A-C JUNIOR.

DIRECTIONS

For pools having just visible algae growth add an initial dose of 75 to 115 fl. oz. of POOL PAL Q-A-C JUNIOR per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 41 to 75 fl. oz. of POOL PAL Q-A-C JUNIOR per 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 13.5 to 27 fl. oz. of POOL PAL Q-A-C JUNIOR per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of POOL PAL Q-A-C JUNIOR throughout the water in the pool is necessary for maximum effectiveness.

POOL PAL Q-A-C JUNIOR is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. POOL PAL Q-A-C JUNIOR can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix POOL PAL Q-A-C JUNIOR with concentrated dry or liquid chlorine products.

HOW TO ESTIMATE GALLON CAPACITY OF YOUR POOL

Measure Length (L), Width (W) and average Depth (D) in feet.

For Square or Rectangular Pools:

$L \times W \times D \times 7.5$ Gallons

For Circular or Elliptical Pools:

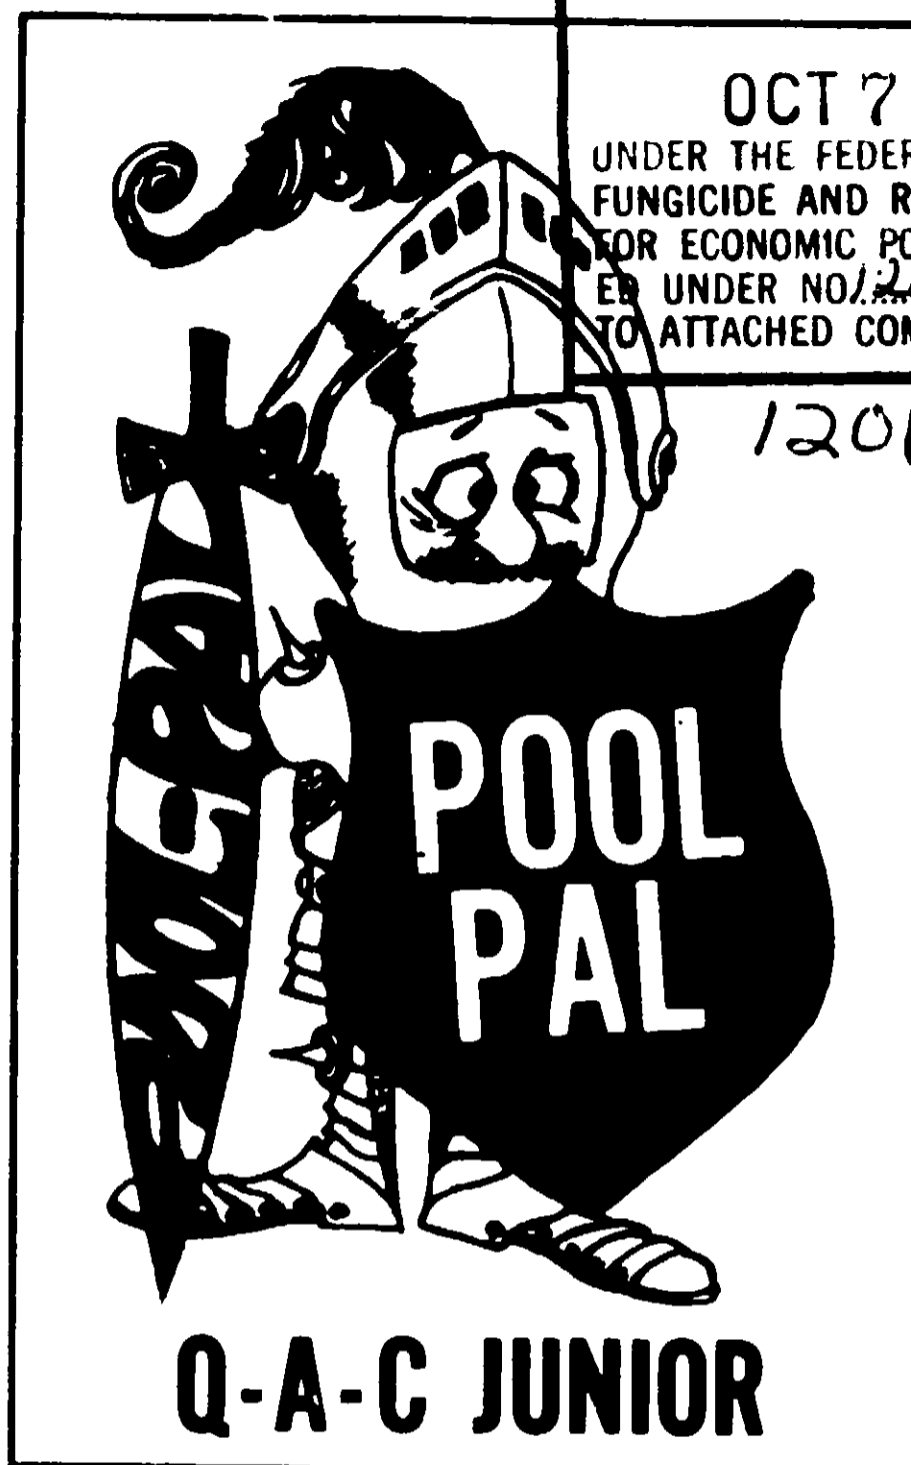

$L \times W \times D \times 5.9$ Gallons

ACCEPTED

OCT 7 1974

UNDER THE FEDERAL INSECTICIDE FUNGICIDE AND RODENTICIDE ACT FOR ECONOMIC POISON REGISTERED UNDER NO. 12014-6 SUBJECT TO ATTACHED COMMENTS.
