NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

1. Submit five (5) copies of your final printed labeling before you release the product for shipment.
1. Submit five (5) copies of your final printed labeling before you release the product for shipment.
 2. Add the phrase "EPA Registration No. 12014-30" to your label before you release the product for shipment.
 3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of the printed labeling.
- If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.
- A stamped copy of the label is enclosed for your records.

 EPA Est. No. 12014-WI-1

NET WT. 5 lbs. (2.27 kg)

A&V, Incorporated
 Sussex, WI 53089

DIRECTIONS FOR POOL USE

It is a violation of Federal law to use the product in a manner inconsistent with its labeling. This product is a concentrated chlorine agent in dry, free-flowing form. This product controls growth of algae and effectively kills many bacteria, thus helping to keep the pool in a sanitary condition. Use clean, dry cup to measure this product.

READ THE PRECAUTIONARY STATEMENTS BEFORE USE.

INITIAL CHLORINATION: For initial chlorination of any pool water, add 1 oz. of this product for each 1,000 gallons. Allow 5 minutes to dissolve and then test the chlorine residual with a pool test kit and if below 1.0 ppm., repeat this dosage until 1.0 ppm is obtained. Pool should not be entered until chlorine residual reads 1.0-3.0 ppm.

ROUTINE CHLORINATION DOSAGE: Subsequently add 3-4 oz. of this product per 5,000 gallons daily or as often as needed to maintain 1.0 ppm whether the pool is in use or not. Use a test kit frequently to determine chlorine residual. If any chlorine residual is present, it is possible to increase the residual in pool water by 1.0 ppm by using 1 oz. per 5,000 gallons of water. For best results, add this product as a solution (1 oz. in 2 qts. of water) to the pool water or scatter the granular material directly over the pool surface.

MAINTENANCE OF pH: pH should be maintained in the 7.2-7.6 range. Maintaining 1.0 ppm chlorine residual and 7.2-7.6 pH range will result in clean, sparkling water.

STABILIZED POOLS: If cyanuric acid is used to stabilize available chlorine, follow label directions for that product. Always maintain the chlorine residual at 1.0-1.5 ppm as determined by test kit. Add 3 oz. of this product per 10,000 gallons every other day or as often as

needed to maintain 1.0-1.5 ppm chlorine residual. To control algae during the pool season, superchlorinate every two weeks at the rate of 1 oz. of this product per 1,000 gallons of water when the average afternoon temperature is below 80 F and once every week when the temperature is above 80 F. Pool should not be entered until chlorine residual reads 1.0-3.0 ppm.

SHOCK TREATMENT OR SUPERCHLORINATION: If algae develop, shock treat or superchlorinate the pool water by adding 1 oz. of this product for each 500 gallons of water. Allow 5 minutes for this product to dissolve and repeat if necessary. Thoroughly clean pool by scrubbing surface of algae growth, then vacuum and cycle through filter. Pool should not be entered until chlorine residual reads 1.0-3.0 ppm.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Highly Corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves or only thoroughly clean, dry utensils when handling. Irritating to nose and throat. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARD

This product is toxic to fish. Do not contaminate lakes, ponds, or streams by cleaning of equipment or disposal of wastes.

FIRST AID (PRACTICAL TREATMENT)

IF ON SKIN: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. **IF INHALED:** Remove person to fresh air. Get immediate medical attention. **IF IN EYES:** Flush with cold water for at least 15 minutes. Get immediate medical attention. **IF SWALLOWED:** Drink large quantities of water. Do not induce vomiting. Call a physician.

CHEMICAL HAZARDS

DANGER. Strong oxidizing agent. Mix only into water. Contamination may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire and explosion. Avoid any contact with flame or burning material, such as a lighted cigarette. Do not contaminate with moisture, garbage, dirt, organic matter, chemicals including other pool chemicals, pool chlorinating compounds, household products, cyanuric acid pool stabilizers, soap products, paint products, solvents, acids, vinegar, beverages, oils, pine oil, dirty rags or any other foreign matter. Do not use moist or damp utensils.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Store in cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Place in trash collection. Do not contaminate food or feed by storage, disposal, or cleaning of equipment.
