Danger—Poison—Precautions

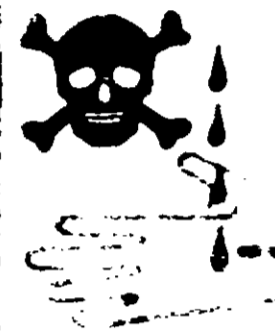

CAN KILL YOU IF SWALLOWED

This product can kill you if swallowed. Do not eat or drink anything for at least 4 hours after swallowing.

CAN KILL YOU BY SKIN CONTACT

This product can kill you if touched by skin or clothes. Wash skin immediately with soap and water. Wash clothes before re-use. In case of spillage, wash thoroughly with water.

CAN KILL YOU IF BREATHED

This product can kill you if vapors, spray mist or dust are breathed.

POISONOUS TO FISH AND WILDLIFE

This product is extremely toxic to fish and other wildlife. Birds and other wildlife may be killed. Keep out of any body of water. Do not apply when weather conditions favor drift to water areas. Do not use where birds or other wildlife are present. Do not contaminate water by cleaning the container or pouring out contents. Apply according to directions on the label.

POISONOUS TO BEES

This product is highly toxic to bees. Do not use on flowering plants. Do not use in areas where bees are present.

DANGER

Do not use when pregnant, nursing or trying to get pregnant. Just before use, wash hands with soap and water. Do not eat, drink, use tobacco, or operate machinery and vehicles during use. Wash hands frequently after use. Wear protective clothing and shoes. Do not breathe vapors. Do not get on face. Do not use in areas where children or pets are present. Wash hands thoroughly with soap and water after handling. Do not eat, drink or smoke if water gets into eyes. Immediately flush with water for at least 10 minutes and get medical attention. In case of contact, remove all contaminated clothing and wash skin with soap and water. Wash clothing before re-use. In case of spillage, wash it with large amount of water. Do not

CAN KILL YOU IF BREATHED

This product can kill you if vapors, spray mist or dust are breathed.

POISONOUS TO FISH AND WILDLIFE

This product is toxic to fish and wildlife and other wildlife in treated areas may be killed. Keep out of any body of water. Do not apply when weather conditions favor drift from treated areas. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

POISONOUS TO BEES

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

DANGER

Do not swallow or get in eyes, on skin or on clothing. Do not breathe dust or vapors or spray mist. When clean natural rubber gloves, clean waterproof protective clothing and goggles. Replace gloves frequently and destroy used gloves. Wear a mask or respirator of a type passed by the U. S. BUREAU OF MINES for Methyl Parathion protection. Wash thoroughly with soap and water after handling and before eating or smoking. If material gets into eyes, immediately flush with water for at least 10 minutes and get medical attention. In case of contact, remove all contaminated clothing and wash skin with soap and water, wash clothing before re-use. In case of spillage, wash down with large amounts of water. Decontaminate areas and equipment by washing with a concentrated solution of alkali and detergent and rinse with water.

Do not apply or allow to drift to areas occupied by unprotected human or beneficial animals. Vacated areas should not be re-entered until drifting insecticide and volatile residues have completely disappeared within 24 hours after application. Always wear protective clothing.

FIRST AID TREATMENT

Atropine is the emergency antidote for Methyl Parathion poisoning. Obtain emergency supply of Atropine 1:100 grain (0.4mg) atropine tablets from your physician. Keep on hand. Call a physician immediately if person handling or working with Parathion develops poisoning symptoms.

POISONING SYMPTOMS: Weakness, headache, dizziness, nausea, vomiting, diarrhea, cramps, non-reactive pupils, pupal dilatation, sweating and discomfort in chest.

NOTE TO PHYSICIAN: Treatment should be given immediately. The following information is for your reference: Methyl Parathion is a highly toxic organophosphorus compound. It acts as a cholinesterase inhibitor, causing accumulation of acetylcholine at cholinergic synapses. This leads to overstimulation of parasympathetic nervous system. Symptoms include miosis, salivation, lacrimation, sweating, bronchospasm, and respiratory distress. Atropine is the specific antidote. It is a competitive antagonist of acetylcholine at muscarinic receptors. Administer 1-2 mg of atropine intravenously or intramuscularly. Repeat doses may be necessary. Monitor vital signs and respiratory status. Supportive care is also indicated.

KILL YOU IF BREATHED

It can kill you if you breathe it or breathe it.

TOXIC TO FISH AND WILDLIFE

It is toxic to fish and wild life. Do not use in treated areas. Keep out of any body of water. Do not apply where runoff may contaminate water by spray or disposal of wastes. Apply as directed on this label.

TOXIC TO BEES

It is toxic to bees exposed to dusts on crops. Protective measures should be taken from your Cooperative Extension Service.

DANGER

Keep away from skin and clothing. Do not breathe mist. Wear clean natural rubber gloves, protective clothing and goggles. Wash and destroy used gloves. Wear a respirator if passed by the U.S. BUREAU OF PHARMACOLOGY. Wash thoroughly before eating or drinking and before entering into eyes, immediately flush with water and get medical attention. In case of contaminated clothing and wash before reuse. Use large amounts of water. Decontaminate by washing with a concentrated detergent and rinse with water.

Use only on areas protected by protective clothing. Vented areas should not be used. Do not use in fields with 24 hours after application.

TREATMENT

Antidote for Methyl Parathion is a supply of Atropine. 10% solution. Keep on hand if used in areas of working and spraying.

Weakness, dizziness, headache, nausea, vomiting, cramps, and reactive pupils and discoloration of the skin.

Treatment: Wash with soap and water. If necessary, use 1% solution of sodium bicarbonate. If necessary, use 1% solution of sodium bicarbonate.

Atropine is the antidote for Methyl Parathion. It is a parasympatholytic agent which inhibits the action of acetylcholine at the cholinergic synapses. It is very effective in the treatment of Methyl Parathion poisoning. It should be given until the patient is fully recovered.
