Manufactured by **SANOLITE CHEMICAL CORPORATION**
 3449 EL HAMMILTON PARKWAY • BROOKLYN, N.Y. 11218 • 212/671-3050

RAMROD counteracts and neutralizes odors with pleasant fragrance. RAMROD kills crawling insects—silverfish, centipedes, ants. RAMROD controls flying insects—flies, gnats. Odor counteraction will take place on all applications.

SUITABLE FOR USE AS AN AUTOMATIC DISPENSING SYSTEM. For maximum effectiveness, undiluted RAMROD should be applied to the surface of the waste. Where a room is equipped with a dispensing system, reapplication intervals are 30 days. For spray applications outdoors, reapplication intervals are 30 days. Flying insects on the surface of diluted waste will die.

NON-COMMUNICABLE
KEEP FROM CHILDREN
