FEATURES

When MARC 86 is used as directed it will kill and prevent development of Chlorella pyrenoidosa (green). Phorimidium inundatum (black algae), Phormidium retzil (Square D algae). Lyngba versicolor (blue-green) and other swimming pool algae.

MARC 86 is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other cleaners or pre-mixed with other water-treating chemicals. MARC 86 works best when added by itself directly to pool water. MAPC 86 at use dilution is non-corrosive to inanimate surfaces.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMAN AND DOMESTIC ANIMALS

DANGER

Corrosive. Do not get in eyes, on skin or on clothing. Causes severe eye and skin damage. Harmful or fatal if swallowed. Wear goggles or faceshield and ruhber gloves when handling this product. Remove and wash contaminated នូវីបើថ្ងៃពីថ្ងៃ. Avoid contamination of food.

STATEMENT OF PRACTICAL TREATMENT

FIRGT AID: Skin and Eyes: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes, for eyes, call bhysician.

INGESTION: Is swallowed drink milk, egg whites; gelatin solution, or, if these are no available, large quantities of water. Avoid

available, large quantities of water.

alcohol. Call a physician.

.PROHIBITIONS

Do not contaminate water, food or feed by storage or disposal.

Open dumping is prohibited. If container is plastic and less than 30 gallons, Ido not reuse container.

2.PESTICIDE DISPOSAL

Pesticide, spray, mixture or rinsate that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies.

DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Initial Dose: 1 gallon MARC 36 to 50,000 gallons of water.

Maintenance Dose: 1 quart MARC 86 to 50,000 gallons of water.

Initial dose is used when filling pool at beginning of swimming season. If pool has visable algae growth, treat with initial dose. Jacuum pool after 24 hours to remove algae debris. If visible algae are still present or re-appear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added at 3-5 day intervals, if high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently, if make-up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of MARC 86 for each (0,000 gallons of fresh make-up water added per veek. When swimming season is over, add 1 gallon of MARC 86 to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the gool before it is returned to use the following ∍eason.
