

DIRECTIONS

For an initial application use one gallon of this algicide per 25,000 gallons of water. Use one quart per 50,000 gallons of water every fifth to seventh day depending on weather and use factors.

The initial dose is used when filling pool at beginning of swimming season and in a clean pool free of visible algae. If pool has visible algae growth treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of algae, use recommended maintenance dose.

After each rain of consequence, add one quart per 50,000 gallons water. Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy accumulation of algae growth is difficult to remove. The appropriate amount of this algicide should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool. Recirculation or swimming activity will assure rapid dispersion.

TO DETERMINE POOL CAPACITY

Rectangular Pools Length times width times average depth (in feet) times 7.5 equals gallons.

Round and Oval Pools Average diameter times average diameter times average depth (in feet) times 5.9 equals gallons.

ALLSTATES CHEMICAL

ALGICIDE

Active Ingredients:

Aikyl (C₁₄, 58% - C₁₈, 28% - C₁₂, 14%)
dimethyl benzyl ammonium chloride 10%

Inert Ingredients:

90%

DANGER

KEEP OUT OF REACH OF CHILDREN

(See first aid statement & other precautions on back panel.)

This algicide is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of algae and being volatile, aids in maintaining pool water clarity and clarity. The residual effectiveness of this algicide tends to complement the total chemical treatment system.

This algicide is compatible with all chemicals normally used in swimming pool maintenance; however, in its concentrated form this chemical should not come into contact with concentrations of chlorine. **DO NOT MIX THIS ALGICIDE AND CHLORINE TOGETHER** when adding to the pool. These chemicals should be handled separately.

This algicide is economical, efficient, stable.

DANGER: Keep Out of Reach of Children. Corrosive, causes eye damage and skin irritation. Do not get in eyes, on clothing, or on skin. Wear goggles or face shield and gloves when handling. Harmful or fatal if swallowed. Contamination of food.

FIRST AID: In case of contact, immediately flush skin with plenty of water for at least 15 minutes. For eye contact, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may indicate the use of gastric lavage. Measures against respiratory shock, respiratory depression and convulsions may be needed.

Rinse empty container thoroughly with water and discard.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, or public water.

Apply this product only as specified on this label.
