

KILLS

Ants, Roaches, Crickets, Brown dog ticks, Silverfish, Earwigs, Fleas, Spiders, and Sowbugs including those resistant to certain chlorinated hydrocarbon and phosphate insecticides

Aids in controlling Flies and Mosquitoes out of doors

**CAUTION
KEEP OUT OF REACH OF CHILDREN**

May be harmful if swallowed, inhaled or absorbed through skin. Avoid inhalation of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes and clothing should be avoided. Wash thoroughly with soap and water after handling. Avoid contamination of food and utensils and food preparation areas. If poisoning occurs, get prompt medical aid.

Remove pets and cover fish bowls before spraying.

Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine is an antidote.

Do not spray in air in room or use on plants. Apply as a surface spray only as specified on this label.

Do not allow children or pets to contact treated surface until spray has dried.

This product is toxic to fish, birds, and other wildlife. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies.

Keep container closed. Do not store, pour or spill near heat or open flame.

**RESIDUAL ROACH, AN
BUG KILLER**

CONTAINS HIGHLY-ACTIVE CHLORPYRIFOS*

ACTIVE INGREDIENTS:

- Pyrethrins
 - ** Piperonyl butoxide, technical
 - £ N-octyl bicycloheptene dicarboximide
 - Chlorpyrifos (o, o-diethyl o- (3, 5, 6-trichloro-2-pyridyl) phosphorothioate)
 - Aromatic petroleum distillate
 - Petroleum distillate
- Total
- ** Consists of .08%(butylcarbityl) (6-propylpiperonyl) ether and .02% related compounds
 - £ MGK 264, Insecticide Synergist.
 - U.S. Pat. No. 3,244,586.

ROACH, ANT & R

Y-ACTIVE CHLORPYRIFOS*

DIRECTIONS FOR USE For Spot Applications Only

GENERAL. Chlorpyrifos with synergized pyrethrum is used as a spot treatment to control cockroaches, silverfish, spiders and other pests specified below. Using a suitable sprayer, apply as a coarse (large droplet) spray to localized areas where pests may occur. Spray surfaces until wet. Re-treat as needed.

FOOD HANDLING ESTABLISHMENTS. Places other than private residences in which exposed food is held, processed, prepared or served.

FOOD AREAS APPLICATION LIMITED TO CRACK AND CREVICE TREATMENT ONLY. Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas (when food is exposed and facility is in operation) also would be considered a food area.

Apply in small amounts directly into cracks and crevices, using equipment capable of delivering a pin stream of insecticide, in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases, *motor housings, *junction boxes, *switch boxes or *conduits where roaches, spiders, ants and crickets hide. *Prior to application de-energize electrical equipment; after application, allow time for oil to evaporate before starting motors or placing switches in the "on" position. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air.

Avoid contamination of food or food processing surfaces.

INSECTICIDE
ACT
REGISTERED

— (Spot application only) Includes garbage rooms, lavatories, floor drains (to sewers entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage after canning or bottling).

Apply to baseboard areas, around water pipes, surfaces behind and beneath sinks, lockers, tables, pallets and similar areas where insects hide or through which they may enter, to kill cockroaches, ants, crickets, silverfish, spiders and sowbugs. Pests driven out of hiding places should be sprayed directly. For ants, apply to ant trails, also around doors and windows and wherever else these pests may find entrance. Repeat as necessary.

Thoroughly apply as a spot treatment, to kill brown dog ticks and fleas, to infested areas such as pet beds and resting quarters, nearby cracks and crevices, along and behind baseboards, window and door frames and localized areas of floor and floor coverings where these pests may be present. Old bedding should be removed and replaced with clean, fresh bedding after treatment.

Use only out of doors as an aid in reducing annoyance from flies and mosquitoes. Spray outside surfaces of window and door frames as well as other areas where these pests may enter the home. Also spray dark corners and localized resting areas (such as under eaves) or porches, patios and garages where these insects may congregate. Flies and mosquitoes coming to rest on treated surfaces will be killed. Repeat treatment when necessary.
