DELETE

vegetation killer

DELETE is effective for bare ground weed control around guard rails, airports, military installations, highway medians, pipelines, railroads, lumberyards, rights-of-way, buildings, storage areas, fences, pumps, machinery, fuel tanks, drainage ditch banks, recreational areas, tennis courts, roadways, or similar areas.

IMPORTANT: Read the entire Directions for Use and the Conditions of Sale and Warranty before using this product.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Uniformly spray 1-2 gals. of DELETE mixed in 10 gals. of water over 1,000 sq. ft. of soil surface. Thoroughly wet all foliage to insure contact action. Best results are obtained when applications are made during or after weed emergence while growth is succulent. Where vegetation is tall and dense use 1 1/2-3 gals. of DELETE in 10 gals. of water per 1,000 sq. ft. For control of hard-to-kill perennial weeds and grasses such as johnsongrass, bindweed and wild carrot use 3-4 1/2 gals. per 1,000 sq. ft. Although DELETE has considerable activity through foliar contact, much of its activity is through the roots and, therefore, adequate rainfall to move the chemical into the root zone is necessary.

Under conditions where the rainfall is high and the growing season long, a second application may be necessary to maintain a weed-free soil surface.

Care must be taken to keep this herbicide away from desirable flower beds, lawns and shrubs. Do not apply over roots of valuable trees or woody ornamental plants. Only apply herbicide outside the dripline of trees. Avoid spray drift to desirable plants.

WARRANTY STATEMENT
