

POISON

CAUTION

MAY CAUSE SKIN IRRITATION.

May irritate eyes, nose and throat.
Avoid breathing spray mist.

ANTIDOTE

If contacted flush off with plenty of water.
If swallowed get medical attention.

FISH &/OR WILDLIFE CAUTIONS

Do not contaminate water by cleaning equipment, or disposal of wastes.

Apply this product only as specified on this label.

DIRECTIONS

To control most weeds for an extended period of time on non-cropland areas apply Weed Killer as follows:

To control ANNUAL AND PERENNIAL WEEDS AND GRASSES use:

1 gallon per 700 to 1000 sq. ft.
To control Hard-to-Kill Perennial weeds and grasses, such as, Johnsongrass, Bermudagrass, Dallisgrass, Nutgrass, Vasey grass, Saltgrass, Bouncing Bet, Dogbane, Bracken fern, use:

1 gallon per 500 to 700 sq. ft.
The above dosage should be diluted with sufficient water to cover the area to be treated uniformly. Use the higher dosage range on absorptive soils. Weed killer may be applied with a fixed boom power sprayer, hand tank type sprayer, or sprinkling can depending upon size of area to be treated.

APPLY: Mix 1 gallon Weed Killer with 10 gallons of water to provide an area to be treated.

IMPORTANT

Weed Killer is a concentrated weed killer of the non-sterilant nature. DO NOT apply directly to flush equipment on or near desirable trees or other plants or areas where their roots may come in contact with the chemical. DO NOT use on lawns and other similar areas. Prevent spray drift to desirable plants. DO NOT contaminate domestic water. Keep from contact with fertilizers, insecticides, fungicides, and seeds. Clean equipment after use. DO NOT use equipment for spraying insecticides, fungicides and fertilizers, as plant injury may result. DO NOT apply when ground is frozen.

NOTICE TO BUYER

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

AN EXCLUSIVE PRODUCT SOLD BY

PIONEER CHEMICAL INC.

PIONEER PLANT GENERAL OFFICE
BOX 787
PIONEER CITY, OKLA. ALLEN, OKLA. KANSAS

GENERAL INFORMATION

Weed Killer is a liquid concentrate designed to be diluted with water and applied as a spray on non-cropland areas where bare ground is desired. Weed Killer is an effective general herbicide for the control of many annual and perennial weeds and is particularly useful for control of perennial grasses.

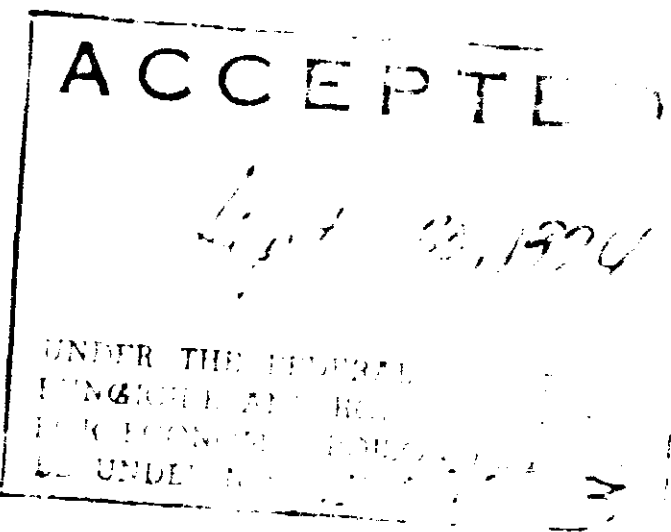

Effects are slow to appear and may not become apparent until chemical has been carried into the root zone of the weeds by moisture. With this in mind during dry season it is suggested that additional amounts of moisture be used to carry the Weed Killer to the root zone. The duration and degree of control will vary with the amount of chemical applied, soil type, rainfall and other conditions.

Weed Killer has been found to provide effective control of such grasses and weeds as: foxtail, ryegrass, wild oats, crabgrass, bentgrass, bromegrass, ryegrass, lamb's quarters, turkey quill, barngrass, bluegrass, redtop, purpletop, packgrass, broomsedge, aster, dandelion, dog fennel, goldenrod, plantain and wild carrot, johnsongrass, bermudagrass, dallisgrass, nutgrass, vaseygrass, saltgrass, bouncing bet, dogbane, bracken fern and horsetail.

Weed Killer is designed to control most weeds for an extended period of time on non-cropland areas such as INDUSTRIAL PLANT SITES, STORAGE AREAS, RAILROAD AND PIPELINE RIGHT OF WAYS, PETROLEUM TANK FARMS, LUMBER YARDS.

E.P.A. Reg. No. 42355-3

**Semi-Soil Sterilant
WEED KILLER
VAN-SH**

ACTIVE INGREDIENTS:

Lithium salt of Bromacil (5-bromo-3-sec-butyl-6-methyluracil).....2.62%

INERT INGREDIENTS:..... 97.38%

100.00%

Do not reuse container. Destroy plastic containers when empty. Return drums to reconditioner. Destroy cans and drums not returned to reconditioner) by perforating or crushing and burying in a safe place away from water supplies.

WARNING

Keep Out of Reach of Children.
