

This disinfectant is effective against a wide variety of gram positive and gram negative bacteria, including staphylococci, streptococci, bacilli, and enterococci. It is also effective against fungi, including dermatophytes, and yeasts. It is also effective against viruses, including herpes, adenovirus, hepatitis, and influenza.

This disinfectant is also an excellent disinfectant for use on hard surfaces, including floors that are highly trafficked.

Mixes readily with water and makes a wide variety of cleaning solutions. It is non-corrosive and non-staining to most surfaces, including stainless steel and common metals. Has a pleasant mint odor.

This product may be used through automatic dispensing equipment.

MUST NOT BE USED ON FOOD CONTACT SURFACES

PRECAUTIONARY STATEMENTS

HAZARDOUS TO HUMANS & DOMESTIC ANIMALS

DANGER

Causes eye damage and skin irritation. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful if swallowed. Avoid contamination of food. Avoid breathing spray mist.

PHYSICAL & CHEMICAL HAZARDS

Do not use near open flames or heat.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into streams, rivers, ponds, or other bodies of water unless it is approved by local authorities.

STORAGE AND DISPOSAL

Store only in tightly closed original container in a cool, dry, well-ventilated area. Do not store near food, feed, or feed ingredients. Storage in this area is prohibited.

Discharge wastes into a sanitary disposal system. Do not discharge into water.

Spill: Spray mistake, or residue is a violation of Federal law. If these wastes cannot be disposed of in a sanitary disposal system, contact your local waste disposal authority. Environmental Protection Agency, the hazardous waste representative of the nearest EPA Regional Office, for guidance.

Do not reuse empty container. To prevent injury, do not mix with water. Before metal items, for example, are placed in a solution, they should be sanitized, preferably by other procedures approved by local health authorities. Empty containers may be recycled for a variety of uses, as determined or allowed by local authorities. Do not burn. If burned, stay out of smoke.

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

DIRECTIONS

For general disinfection of hard, non-porous, inanimate surfaces (glass, metal, plastic, glazed porcelain, enameled, tile, leather, vinyl, enamel and finished wood surfaces) on walls, floors, appliances, and furnishings in industrial and commercial offices, restaurants, and work areas:

CLEANING & DEODORIZING: Whenever practical, first away spots with water. For cleaning and deodorizing, use 5 to 8 oz. of this product per gallon of water. Cleaning may be accomplished with a clean mop, sponge, squeegee, wet vacuum system, or a mechanical spraying device. After cleaning, remove suspended solids with a clean water rinse, vacuum pick up or by wiping with a clean mop, sponge, squeegee or cloth.

DISINFECTING: Before disinfecting, pre-clean surfaces as directed above. Then, prepare 5 oz. of the disinfectant per gallon of water and thoroughly wet the surfaces to be disinfecting. The disinfecting solution must contact the surface for 10 minutes for proper disinfection. After the surfaces may then be rinsed with clear water or wiped with a clean, damp cloth.

For cleaning and deodorizing of garbage cans, garbage trucks, industrial waste receptacles, and other garbage handling equipment, it is particularly important to pre-clean in order for the disinfectant to perform properly. Then apply a wetting solution of 8 oz. of this product per gallon of water.

For cleaning of walls, floors and industrial work areas, use 5 to 8 oz. per gallon of water. The use of rubber gloves is recommended for persons doing continuous hand cleaning.
