JUN 27 1975  
Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under  
EPA Reg. No. 12393-3

ACCEPTED WITH COMMENTS

## ALGAECIDE 10

Algaecide is compatible with all chemicals used for treating swimming pool water. It works best in slightly alkaline water having a pH of between 7.2 and 7.8. Algaecide is simply poured into the water from any point. It quickly distributes itself throughout the entire pool. In pools equipped with a circulating system it may also be added through the filter.

### DIRECTIONS

FOR INITIAL TREATMENT UPON FILLING POOLS, USE:

One gallon for each 20,000 gallons of water.

One quart for each 5,000 gallons of water.

FOR SUBSEQUENT TREATMENT USE:

One quart for each 5,000 gallons of water.

SUBSEQUENT TREATMENT should be given every five days if high temperature prevails and pool is continually being used. One quart should be added per 5,000 gallons.

MANUFACTURED BY AQUA CHEMICAL CORP. SPRINGFIELD, MASS. 01104

## WARNING

Do not get in eyes or skin or on clothes. Use mask or face shield when handling. Causes severe eye damage and skin irritation. In case of contact flush eyes and skin with water for at least fifteen minutes. For eyes get medical attention. Avoid contamination of food. Remove and wash contaminated clothing before reuse.

### HARMFUL IF SWALLOWED

## FIRST AID

If swallowed do not induce vomiting. Drink large quantities of fluids and seek medical attention immediately.

### KEEP OUT OF REACH OF CHILDREN

Do not use in hot tubs. Treated water should not be discharged where it will contact fish or other aquatic life. Empty containers should be rinsed with water and disposed of properly.
