OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

JUN 11 2008

John Lublinkhof
Director of Regulatory Affairs
Bell Laboratories, Inc.
3699 Kinsman Blvd.
Madison, WI 53704

Subject: Label Notifications for Pesticide Registration Notice 2007-4

Dear Mr. Lublinkhof:

The Agency is in receipt of your Applications for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 dated May 7, 2008 for:

EPA Registration 12455-97
EPA Registration 12455-91
EPA Registration 12455-94
EPA Registration 12455-95

Fastrac Place Pacs
Final Rodenticide Ready-To-Use Place Pac
Final Rodenticide Place Pac
Fastrac All-Weather Blox

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and finds that the label change(s) requested falls within the scope of PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-8893.

Sincerely,

A handwritten signature in black ink, appearing to be "Linda Arrington".

Linda Arrington
Notifications & Minor Formulations Team Leader

Section II (Explanation)

Notification of label change per PR Notice 2007-4. This notification is consistent with the guidance in PR Notice 2007-4 and the requirements of EPA's regulations at 40 CFR §§ 156.10, 156.140, 156.144, 156.146, and 156.156. No other changes have been made to the labeling or the Confidential Statement of Formula for this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statements to EPA. I further understand that if the amended label is not consistent with the requirements of 40 CFR §§ 156.10, 156.140, 156.144, 156.146, and 156.156, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Please see attached label incorporating the changes. The changes are highlighted in gray in the Storage and Disposal section.

OUTER CONTAINER - COMPLETE LABEL - ALL PACKAGE WEIGHTS

FASTRAC[®]
PLACE PACS

NOTIFICATION

JUN 11 2008

KILLS RATS AND MICE

**KILLS ANTICOAGULANT RESISTANT NORWAY RATS, ROOF RATS
AND HOUSE MICE**

Norway rats, Roof rats and House Mice usually consume a lethal dose in a single night's feeding, but it may take two or more days from the time of bait consumption for these rodents to die. Rodents cease feeding after consuming a toxic dose. Fastrac Place Pacs kills anticoagulant resistant rats and mice.

ACTIVE INGREDIENT:

Bromethalin (CAS #63333-35-7):	0.01%
INERT INGREDIENTS*	99.99%
TOTAL		100.00%

*Contains Denatonium Benzoate

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

FIRST AID

HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE

IF SWALLOWED:

- Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

NOTE TO PHYSICIAN OR VETERINARIAN

FASTRAC is not an anticoagulant rodenticide. If ingested, limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

See Back/Side Panel for First Aid and additional precautionary statements:

NET CONTENTS: 3.3 lb. (1.5 kg) [100 x 0.53 oz. (15 g) Place Pacs]
5.3 oz. (150 g) [10 x 0.53 oz. (15 g) Place Pacs]

Manufactured by:

Bell Laboratories, Inc.
Madison, WI 53704

EPA REG. NO. 12455-97

EPA EST. NO. 12455-WI-1

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or nontarget animals to rodenticides. To help prevent accidents:

1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hooved livestock, raccoons, bears or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled or unconsumed bait as specified on this label.

USE RESTRICTIONS: For control of Norway rats, roof rats and house mice. When used in USDA-inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

URBAN AREAS: This product may be used in and around the periphery of homes, industrial, commercial, and public buildings. May also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. May also be used in alleys. Do not use in sewers.

NON-URBAN AREAS: This product may be used inside of homes and agricultural buildings.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

Rats: Apply 2 to 12 place pacs per placement (usually at intervals of 15 to 30 feet). Adjust the amount of bait applied to the level of rat feeding expected at each bait placement.

Mice: Apply 1 place pac per bait placement. Space placements at intervals of 8 to 12 feet in infested areas. Two place pacs may be used at points of extremely high mouse activity.

Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity.

Normally, the volume of bait consumed will be significantly less with bromethalin baits than with anticoagulant baits. Although one night's feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Using gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfestation, limit sources of

rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Do not get in eyes, on skin or on clothing. Wash thoroughly with soap and water after handling. Wear gloves if bait is handled.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

PESTICIDE CONTAINER: ~~Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available.~~ Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration or, if allowed by state and local authorities, by burning. If burned stay out of smoke. Call your Local Waste Agency for any questions on proper disposal.

Alternate Environmental Hazards Language for packaging intended solely for consumer use (One lb. or less)

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water.

Alternate Storage and Disposal Language for packaging intended solely for consumer use (One lb. or less)

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

DISPOSAL: ~~If empty: Nonrefillable container. Do not reuse or refill this container.~~ Place in trash or offer for recycling if available. **If partially filled:** Place in trash or call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

OPTIONAL MARKETING STATEMENTS:

- For Quick Kill
- Can Kill in Two Days
- With Bromethalin
- Kills Anticoagulant Resistant Rats and Mice
- Rodents Usually Consume a Lethal Dose in a Single Night's Feeding
- Rodents Cease Feeding After Consuming a Lethal Dose
- Low Secondary Poisoning
- For Use in and Around Homes and Buildings
- For Heavy Infestations
- Use When Resistance is Suspected
- Palatable Formulation
- Mouse and Rat Bait
- For Indoor & Outdoor Rodent Control
- Bait Pacs Can be Used Indoors or Out
- Place Pacs Fit Easily Into Rat Burrow, Runways and Hard to Reach Areas Where Rodents Live and Breed
- DO NOT OPEN PLACE PAC - Simply Position in Desired Locations. Rodents will Open It Themselves
- Place Bait in Locations Where Rodents or Their Signs Have Been Seen
- Maintain an Uninterrupted Supply for 15 Days or Until All Signs of Activity Stop
- Pre-measured
- Convenient
- Easy to Use
- Hands Never Touch the Bait
- Ready To Use
- Made in USA
