

This product is designed for rapid control of Algae and cloudy water. Ideal for spring opening and periodic shock treatment of swimming pool water.

DIRECTIONS

SHOCK TREATMENT: Establish a P.H. reading of 7.2 to 7.6 using test kit. Simply pour shock treatment into pool. One gallon will treat 15,000 gallons of water. This will result in a chlorine residual of 8.3 PPM. It is best to shock treat your pool in the evening or early morning. Resume swimming when chlorine residual reaches less than 2 PPM.

CHLORINATION of pool water to establish a chlorine residual in newly filled pools. Add ½ gallon for each 15,000 gallons of water. Repeat dosage until a chlorine residual of 0.6 to 1.0 PPM is established. Add one quart for each 15,000 gallons of water daily or as needed to maintain a chlorine residual of 0.6 to 1.0 PPM. Test pool water frequently with a chlorine test kit to maintain the desired chlorine residual. The pool water should be maintained at P.H. 7.2 to 7.6 as determined by a test kit.

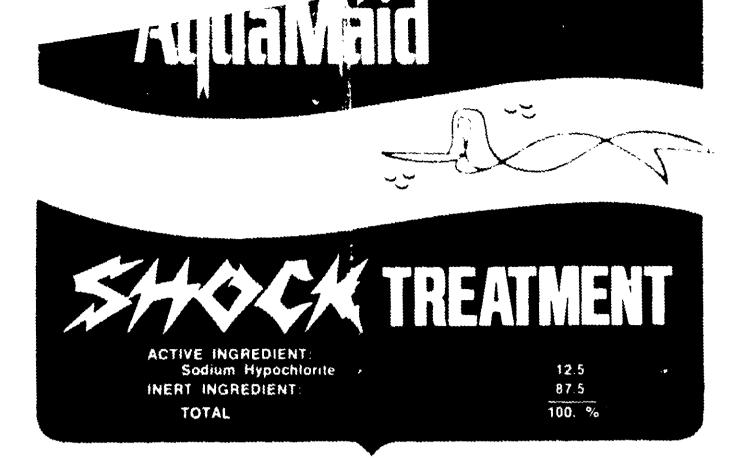

"DEGRADES WITH AGE" Use a test kit and increase dosage as necessary to obtain required level of available chlorine.

WARNING: Keep out of reach of children, Harmful if swallowed. May produce chemical burns. Do not get on skin or in eyes. In case of contact with skin and eyes, flush with plenty of water. If skin irritation persists, get medical attention. For eyes, get prompt medical attention.

FIRST AID: If swallowed, drink promptly a large quantity of milk, egg whites, gelatingso-ution or if these are not available, drink large quantities of water. Call a physician immediately

Rinse empty container with water thoroughly before discarding
