### SHOCK TREATMENT

#### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Shock treatment is needed for algae control when continuous chlorine residuals have not been maintained and to destroy ammonium complexes that have formed in the pool. If algae growth develops, a slimy feel to pool sides, or cloudy pool water, shock treatment should be initiated. Adjust pool water pH to 7.2 - 7.6 and add one gallon of shock treatment, in the evening, for each 14,000 gallons of pool water. This dosage is equivalent to 10PPM available chlorine. Circulate pool water a minimum of 4 hours. Turn off recirculation system and brush pool sides and bottom to loosen dead algae. Vacuum pool the following morning. Do not use pool until chlorine residual falls below 3PPM. Repeat shock treatment as necessary. Shock treatment is recommended for spring openings as well as every other week and more often during heavy use periods or exposure to high temperatures or strong sunlight.

MANUFACTURED BY  
 AQUAMAID CHEMICAL CORP. SPRINGFIELD, MA  
 E.P.A. EST. NO. 12465-MA-1 E.P.A. REG. NO. 12465-3  
 E.P.A. EST. NO. 12465-OH-1

**DANGER: Keep Out of Reach of Children**  
 POISONOUS IF SWALLOWED  
 IRRITATING TO SKIN, EYES AND RESPIRATORY ORGANS

**DANGER:** Corrosive, may cause severe skin irritation or chemical burns to broken skin. Cause eye damage. Do not get in eyes, on hair, or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas if toxic vapors. Do not return until odors have dissipated.

**ENVIRONMENTAL HAZARD:** This pesticide is toxic to fish and other aquatic life. Do not discharge into lakes, streams or ponds. Treated effluent cannot be discharged into lakes, streams or public waters unless a discharge permit is obtained. For guidelines contact the regional office of the Environmental Protection Agency.

**PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT:** Mix only with water according to label directions. Mixing this product with growth stock as feces, urine, etc., or with ammonia, acids, detergents or other chemicals will release hazardous gases irritating to eyes, lungs and mucous membranes.

**STORAGE AND DISPOSAL:** Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landfill. Product or residue that cannot be used should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

**FIRST AID:** If on skin, wash with plenty of soap and water. Rinse eyes with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk or gelatin solution, or if these are not available, drink any quantity of water. Do not give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

**NOTE:** This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.
