DANGER: Keep Out Of Reach Of Children

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Corrosive may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent cannot be discharged into lakes, streams, ponds or public waters unless a discharge permit is obtained. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids, detergents or other chemicals will release hazardous gases irritating to eyes, lungs and mucous membranes.

STORAGE AND DISPOSAL: Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

FIRST AID: If on skin wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk, or gelatin solution, or if these are not available, drink large quantities of water. Do not give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

NET CONTENTS: 5 GALLONS

REGULAR TREATMENT: Use one quart per 14,000 gallons of pool water every day, even if the pool is not used. Pool should be treated as needed to maintain 1.0 to 1.5 ppm residual chlorine. Do not use pool until residual is between 1.0 and 3.0 ppm as determined by a test kit.

SHOCK TREATMENT: SHOCK TREATMENT is recommended every other week — more often during heavy use periods. Use SHOCK TREATMENT at rate of 1 gallon per 14,000 gallons of pool water. Apply in evening after pool has been closed. SHOCK TREATMENT is needed for algae control when continuous chlorine residuals have not been maintained and to destroy ammonium complexes that have formed in the pool. Do not use pool until residual is between 1.0 and 3.0 ppm as determined by a test kit.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.
