

**DANGER: KEEP OUT OF REACH OF CHILDREN.** Corrosive. Causes eye damage. Do not get in eyes or on skin. Do not breathe dust. May cause skin, nose and throat irritation. Wear safety goggles, dust respirator and protective clothing when handling. May be fatal if swallowed. May cause burns to broken skin.

Strong oxidizing agent. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. In case of decomposition, if possible isolate container in open air or well ventilated area. Decomposes at 350-375 degrees with liberation of harmful gases. Flood with large volume of water if necessary. Do not reuse container. Rinse empty container thoroughly with water and discard.

**FIRST AID:** In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Clean contaminated clothing before reuse.

If swallowed, feed gruel or cooked cereal followed by olive oil or cooking oil. Call a physician immediately.

This product is toxic to fish. Treated effluent water should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Apply this product only as specified on this label.

Manufactured by:  
AQUA CHEMICAL CORP.

# AquaMaid

## GRANULAR CHLORINE CDB CLEARON NEW FIRE RESISTANT

ACTIVE INGREDIENT:

Sodium Dichloro-S-Triazinetrione Dihydrate .....	100%
Available Chlorine .....	56%

**DANGER: Keep out of reach of children.  
See First Aid and Precautions On Side Panel**

Net Weight 3 lbs.

EPA Reg. No. 100-100-0100

**NEW FIRE RESISTANT  
AQUA MAID  
CONCENTRATED POOL CHLORINE**

- Features a dry chlorine that dissolves immediately.
- A most effective germicide and algaecide.
- Will maintain crystal clarity in your pool.
- Will not add scale forming minerals to the water.
- Flame-resistant.

The control of pH is greatly simplified using Aqua Maid concentrated Pool Chlorine. In fact, you will require from  $\frac{1}{2}$  to  $\frac{1}{4}$  times the amount of acid usually applied. Aqua Maid concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and maintains constant strength regardless of storage time. It is economical to use because after the pool is stabilized, you will need to apply Aqua Maid concentrated Pool Chlorine less often.

**INSTRUCTIONS**

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 to 1.5 ppm available chlorine. To accomplish this, add 2 oz. Aqua Maid concentrated Pool Chlorine per 1,000 gallons of pool water. The next morning, add Aqua Maid cyanuric acid at the rate of 4 oz. per 1,000 gallons to stabilize the pool.

Aqua Maid concentrated Pool Chlorine should be added daily or as needed at the rate of  $\frac{1}{2}$  to  $\frac{1}{4}$  oz. per 1,000 gallons of pool water to maintain a chlorine residual at all times of 1.0 to 1.5 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6.

A shock treatment should be made every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. For the shock treatment, add 2 oz. of Aqua Maid concentrated Pool Chlorine per 1,000 gallons of pool water. Swimmers should not be permitted in the pool after a shock treatment until the water has reached a chlorine residual of 1.0 to 1.5 ppm.

Keep in mind that a slight flexibility must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 and 1.5 ppm
