SHOCK TREATMENT GRANULAR

The purpose of shock treatment is to provide urgent and immediate treatment of pool water when the following conditions exist:

- Green colored water due to algae
- Visible algae clinging to bottom and sides
- Freshly filled pools that are green or brown due to mineral impurities
- Cloudy water
- Treatment of previous season's water
- Periodic shock treatment as regular maintenance

DIRECTIONS

1. Remove any foreign debris in water.
2. Adjust pool water pH of 7.2 to 7.6 ppm testing with a reliable test kit.
3. Start filter and sprinkle shock treatment over the pool surface at the rate of 1 pound per 7000 gallons of pool water. This will provide 10 ppm chlorine residual.
4. Run filter continuously. Backwash if needed to remove any algae build up on filter. If condition is not corrected within 24 hours, repeat dosage. Swimmers should not be permitted in pool until water has reached a chlorine residual of 1.0 to 1.5 ppm.
5. Resume regular chlorine dosages. Maintain chlorine residual of 1.0 to 1.5 ppm as determined by a reliable test kit.

DANGER

KEEP OUT OF REACH OF CHILDREN

Causes eye damage. Do not use
clothes or on skin. Do not breathe dust.
May cause skin, nose and throat irritation.
Wear safety goggles, dust respirator and
protective clothing when handling. May be
fatal if swallowed. May cause burn to
broken skin.

Strong oxidizing agent. Moisture contami-
nation may liberate irritating and hazardous
chlorine containing gases. In case of de-
composition of rosable selenite container in
open air or well ventilated area. Decompose
at 311.57° degrees with liberation of harm-
ful gases. Flood with large volume of water
if necessary. Do not reuse container. Respon-
sibly container thoroughly with water and
flush.

FIRST AID

In case of personal contact, remove excess
material and flush skin or eyes with cold
water for at least 10 minutes. For eyes, get
medical attention. Clean contaminated
clothing before reuse.

If swallowed, seek medical attention
followed by a physician. Call a
physician immediately.

This product is not for use in drinking
water. It is not to be used where it will
come in contact with food or drink. It
is not to be used in contact with water.
It is not to be used in contact with water.
