**SHOCK**  
**FOR SWIMMING POOL CARE**  
**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Shock is needed for algae control when continuous chlorine residuals have not been maintained and to destroy ammonium complexes that have formed in the pool. If algae growth develops, a slimy feel to pool sides or cloudy pool water exists, shock treatment should be initiated. Adjust pool water pH to 7.2 - 7.6 and add one gallon of shock, in the evening, for each 12,000 gallons of pool water. This dosage is equivalent to 3 PPM available chlorine. Circulate pool water a minimum of 4 hours. Turn off recirculation system and brush pool sides and bottom to loosen dead algae. Additional treatment may be required if necessary. Do not use pool until chlorine residual falls below 3 PPM. Shock is recommended for spring openings as well as every other week or more of an during heavy use periods or exposure to high temperatures or strong sunlight.

**FOR SPRING OPENINGS DOUBLE THE DOSAGE RATE. FOR ROUTINE SHOCK TREATMENT USE 1/2 SEAL CROCK OR CONSULT YOUR DEALER.**

Manufactured for

**DANGER: Keep Out Of Reach Of Children**  
**PRECAUTIONARY STATEMENTS**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Corrosive. May cause severe skin irritation or chemical burns to broken skin. Cause eye damage. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not reenter until odors have dissipated.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent cannot be discharged into lakes, streams, ponds or public waters unless a discharge permit is obtained. For guidance, contact the regional office of the Environmental Protection Agency.

**PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT:** Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids, detergents or other chemicals will release hazardous gases irritating to eyes, lungs and mucous membranes.

**STORAGE AND DISPOSAL:** Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landfill. Product or residue that cannot be used should be diluted with water and disposed of in a sanitary sewer. Do not contaminate feed or feed by storage, disposal or cleaning of equipment.

**FIRST AID:** If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk, or gelatin solution, or if these are not available, drink large quantities of water. Do not give vomac or other acids. Do NOT induce vomiting. Get prompt medical attention.

**NOTE:** This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.
