AQUAMAID

SPA-PREP

BROMIDE SALTS SOLUTION

Part of a two-product system for disinfection of water in spas, hot tubs and therapeutic pools when used with SPA-BOOST.

Active Ingredient:

| | |
|-----------------------------|---------------|
| Sodium Bromide (NaBr)..... | 33.0% |
| Inert Ingredients..... | 67.0% |
| | <u>100.0%</u> |

KEEP OUT OF REACH OF CHILDREN
CAUTION

Back Panel

SPA-PREP

SPA-PREP is a clear solution of bromide salts which remain as a stable bank in spa water. It has no disinfectant properties and it is only when SPA-BOOST is added that bromine is released in water containing SPA-PREP. Regular additions of SPA-BOOST will release bromine in water containing SPA-PREP: SPA-PREP is stable at high temperatures and is compatible with most chemicals normally used to treat water such as sanitizers, acids, bases and algaecides.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SPA-BOOST should be added initially when the spa or hot tub is filled and then weekly thereafter, to maintain a bank of bromide in water.

Step 1 - Treat spa or hot tub water with SPA-CLEAR, stain and scale preventative, according to its label directions.

Step 2 - Add 8 oz. of SPA-PREP per 500 gallons of spa water, directly into spa. Circulate while adding, to assure rapid distribution.

Step 3 - To release bromine from SPA-PREP, it is necessary to add SPA-BOOST regularly to the spa water. Follow directions on SPA-BOOST label.

Weekly - Add 2 oz. of SPA-PREP per 500 gallons of spa water to maintain a sufficient bank of bromide in the water.

Heavy splash out, leakage or backwashing may require more frequent additions of SPA-PREP. Never mix any chemicals with each other before adding to spa.

Test spa water with a suitable test kit for available bromine after each addition of SPA-BOOST and more frequently, if necessary, to assure a bromine residual of 1 to 2 ppm. Do not use spa if residual is above this limit.

3

KEEP OUT OF REACH OF CHILDREN
CAUTION

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

STORAGE & DISPOSAL

Do not reuse empty container. Rinse empty container thoroughly with water and discard it.

AQUAMAID

SPA-BOOST

An oxidizing agent for use with SPA-PREP as part of a two-product system for disinfection of water in spas, hot tubs and therapeutic pools and for use by itself for shock treatment of water in spas and hot tubs.

Active Ingredient:

| | |
|------------------------------|---------------|
| Potassium Peroxymonosulfate* | 34.20 |
| Inert ingredients | 65.80 |
| | <u>100.00</u> |

* Equivalent to 3.6% Active Oxygen

SPA-BOOST

SPA-BOOST is a dual-purpose buffered, non-chlorinating oxidizer for the release of available bromine from the bromide salts contained in SPA-PREP and for the shock treatment of spa and hot tub water. SPA-BOOST can be used in any spa or hot tub to destroy chloramines which may contribute to eye and skin irritation and to help control undesirable odors caused by chemicals. SPA-BOOST is compatible with most chemicals which may be present in water such as sanitizers, acids, bases and algacides. It should never be mixed outside of spa with any other product or chemical.

DIRECTIONS FOR USE

~~It is a violation of federal law to use this product in a manner inconsistent with its labeling.~~

SPA-BOOST should be added initially when the spa or hot tub is filled and then daily as a shock treatment and as an activator for the production of available bromine from the bromide salts of SPA-PREP.

First treat the water with SPA-CLEAR and SPA-PREP according to their label directions.

INITIAL DOSE - add 8 oz. of SPA-BOOST per 500 gallons of water to shock the spa water and to release available bromine.

12465-47

6

MAINTENANCE OF PH AND BROMINE RESIDUALS

Test PH of spa water daily with a reliable test kit and maintain PH between 7.2 and 7.8. Do not allow PH to fall below 7.2. Since the PH of SPA-BOOST is buffered in this range, it will not adversely affect the PH of the spa water.

Test the bromine residual at least once a day with a reliable bromine test kit. Bromine residual must be maintained between 1 and 2 ppm. Heavy usage or length of time spa is in use may require additional doses of SPA-PREP and SPA-BOOST to maintain desired bromine reading. If residual is above 2ppm user must wait until within range before entering spa.

DAILY - When the spa or hot tub is shut off add 4 oz. of SPA-BOOST per 500 gallons of water. Test the bromine residual after SPA-BOOST has been added and ~~allowed to circulate 15 minutes.~~ Maintain bromine residual between 1 and 2 ppm.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS
STRONG OXIDIZING AGENT

Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with liberation of hazardous gases, and possible generation of fire. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water.

FIRST AID

If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately.

If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is registered in accordance with FIFRA Section 3(c)(7)(A) subject to the following conditions:

1. It is understood that you will submit under 3(c)(5) all data required for registration/re-registration of your product under section 3(c)(5) when the Agency requires such data. You will also submit such data.

2. You will submit to the Agency all proposed labeling (as required by 40 CFR 155.106) for your product, and/or revisions specific to the labeling for this country, before you release the product for sale.

3. You will submit to the Agency all data required by 40 CFR 155.106. You will release the product only if you have submitted such data and the conditions of registration are met. The product will be subject to the pesticide laws of the country of sale.

The following changes and/or revisions must be incorporated on the finished printed label which will be used in channels of trade for this product.

- 1 The registration number which has been assigned to this product must appear on the label as EPA Registration No. 12465-47.
- 2 Since the sodium bromide used in this formulation is only 99% active the ingredient statement for "Spa-Prep" must be revised to read:

| | |
|---------------------------|-------|
| Active Ingredients | |
| Sodium Bromide | 32.9% |
| Inert Ingredients | 67.1% |

Please note that the words "Active Ingredients" and "Inert Ingredients" must be aligned to the same margin, be printed in type of the same size and color, and be given equal prominence.

- 3 On the "Spa Boost" label the "First Aid" section should precede the "Physical and Chemical Hazards" section.
