NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase "EPA Registration No. 12465-49" to your label before you release the product for shipment.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

A copy of your proposed label with our acceptance stamp is included with this registration with the understanding that you will comply with the conditions in the attachment to the registration notice.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not handle this product with bare hands. Use gloves or thoroughly clean, dry utensils.

START UP

Before using for the first time, pool water should be stabilized. Follow directions on Conditioner & Stabilizer label. Adjust and maintain the pH in the range of 7.2-7.8 using pH Increase or pH Decrease as indicated by a reliable test kit. Adjust and maintain total alkalinity at 80-100 ppm based on test results and label directions on Total Alkalinity Control. With a shock dose of 2 oz. per 1,000 gallons, using concentrated chlorinating chemical such as Shock Treatment Granular, establish a free chlorine residual of 1.0-1.5 ppm. Repeat this step if necessary, until residual is maintained.

DOSEAGE

These sticks may be used in various types of feeding devices such as a floating dispenser, automatic chlorinator or skimmer basket. Adjust feeding device according to manufacturer's directions to assure a consistent treatment level of 1.0-1.5 PPM of free chlorine residual, determined by a reliable test kit. Dosage rate may vary due to unusual conditions such as high temperature, heavy bather load, flow rate, pH, debris, wind and rain. Therefore frequent use of test kit is recommended. A starting recommendation is to use one stick per 10,000 gallons of pool water. Add additional sticks as required to maintain free chlorine residual. If used in skimmer basket, do not add any other chemical through skimmer when using this product, as a potential explosion hazard may occur. Do not remove them unless necessary. Use sticks in skimmer only if skimmer and piping between skimmer and pump are plastic. When sticks are in skimmer basket of vinyl lined pools, do not turn off pump for more than 8 hours.

SHOCK TREATMENT

It may be necessary to repeat shock dosage on a weekly basis if algae appears, eye burn or chlorine odors are noted, heavy rains, high bather load or high temperature occurs, or if a reliable test kit indicates presence of combined chlorine in excess of 0.2 ppm. Test pool water frequently to maintain proper pH, total alkalinity and free chlorine levels. If shock dose is used, do not use pool until chlorine residual has dropped below 3 ppm.

WINTERIZING

These are excellent for winter use in maintaining water clarity and killing most bacteria under a winter cover. Add to a dispenser according to directions. Do not permit to come in direct contact with a vinyl liner.
