

[12489-1]

ACTIVE INGREDIENTS

- Pyrethrins, Natural Pyrethrum Extracts 0.9%
- Piperonyl Butoxide, Technical 9.0%
- Petroleum Oil 80.1%

INERT INGREDIENTS 100.0%

*Equivalent to 7.2% (butylcarbetyl) (o-propyl-piperonyl) ether and to 1.3% related compounds.

WARNING

Contents under pressure. Do not store above 120°F. Do not use or store near heat or open flame. Do not puncture or incinerate containers. Do not install directly over any food handling or dispensing area. Do not use in nurseries or rooms where infants, ill or aged persons are confined.

AUTOMATIC AEROSOL

EPA Reg. No. 12489-1

A Highly Concentrated Aerosol. Designed for use in Automatic Dispensing Devices. For Control of Flies, Mosquitoes, Flying Moths and Gnats.

To be used indoors wherever these insects are an annoyance in Food Processing Plants, Restaurants, Hospitals, Homes, Stores, Hotels, Motels, Schools, and other Public Buildings, in Canneries, Breweries and Food Handling Establishments.

CAUTION KEEP OUT OF REACH OF CHILDREN. See rear panel for additional precautions.

DIRECTIONS FOR USE

Meter Mist Sequential Aerosol Insecticide is designed for use in automatically-timed discharging devices. Using the metered valve provided, which gives a dosage of 100 mgs. set to discharge every fifteen minutes, one unit will control flies, mosquitoes, gnats and flying moths in an area of approximately 6,000 cubic feet. Factors such as shape of area, temperature, humidity and air currents all affect insect activity and may modify the exact area protected. Insect control will build up within 2 hours after unit is in operation. Used as described, this 12 ounce can contains sufficient insecticide to operate 24 hours a day for 34 days. This will provide for monthly replacement and remaining contents may be used manually.

To use manually, remove cap and direct spray at flies or other insects, pressing actuator button repeatedly. To treat entire area close windows and doors, and press actuator button 7 times per 1000 cubic feet of space, while moving about to distribute the spray in the upper portion of the room. Keep can closed for 15 minutes. Do not re-entrain treated areas until late before re-occupying. Remove pets, birds and livestock from rooms before spraying.
