

# Algae 10

## ACTIVE INGREDIENT

Poly(oxyethylene (dimethylamino) ethylene  
(dimethylamino) ethylene dichloride)

10.0 %

## INERT INGREDIENT

90.0 %

THIS PRODUCT IS A PESTICIDE AS DEFINED BY FEDERAL AND STATE LAWS. USE ONLY AS DIRECTED ON THE LABEL.

**KEEP OUT OF REACH OF CHILDREN**

## CAUTION

### PRECAUTIONARY STATEMENTS

#### HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** Harmful to fish and other aquatic life. Avoid contact with humans and domestic animals.

**FIRST AID:** If swallowed, drink plenty of liquid. If on skin, wash with plenty of water. If in eyes, flush with plenty of water. If inhaled, get fresh air immediately.

**ENVIRONMENTAL HAZARDS:** Do not apply near water. Keep out of streams, rivers, ponds, lakes, and other bodies of water. Do not apply to water. Do not apply to water. For more information, see the label for this product.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Algae 10 is used to control the growth of algae in swimming pools, exterior spas, whirlpools, hot tubs, and decorative fountains. For maximum effectiveness pools, spas, whirlpools, hot tubs, and decorative fountains containing heavy growth of algae should be cleaned prior to using Algae 10.

For pools having just visible algae growth add an initial dose of 75 to 116 fluid ounces of Algae 10 per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool add initially 41 to 75 fluid ounces of Algae 10 per 10,000 gallons of water. Subsequent additions of 13.6 to 27 fluid ounces of Algae 10 per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools, hot tubs, and decorative fountains having just visible algae growth require an initial dose of 8 to 12 fluid ounces of Algae 10 per 1000 gallons of water. For treatment of a freshly cleaned and filled spa, whirlpool, hot tub, or decorative fountain, add initially 4 to 8 fluid ounces of Algae 10 per 1000 gallons of water. Subsequent additions of 1 to 3 fluid ounces of Algae 10 should be made every 5 to 7 days after initial treatment for maintenance.

Algae 10 is compatible with those chemicals normally used to treat pools, spas, and decorative fountains and is effective at both acid and alkaline pH. Algae 10 can be used in pools, spas, and decorative fountains treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Algae 10 with concentrated dry or liquid chlorine products.

## STORAGE AND DISPOSAL

**STORAGE:** Keep container closed when not in use. Leaking or damaged containers should be placed in a plastic bag and discarded in trash. Mop up spills with clear water. All pesticides should be kept out of reach of children and stored away from food.

**DISPOSAL:** Do not reuse empty container. Wrap container and place in trash.
