

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER: Corrosive. May cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without a valid discharge permit. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS:
STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc. or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

POOL SANITIZER**

ACCEPTED
12711-4
JUN 4 1982
Under the Federal Insecticide, Fungicide, and Plant Growth Regulator Act, registered for the purpose of disinfecting swimming pools.

**"FOR SWIMMING POOL CHLORINATION
AND SANITIZING."**

ACTIVE INGREDIENT 9.2%
INERT INGREDIENTS 90.8%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If eyes flushed with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk or great milk. If none of these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

See a 12711-4 product label for more details.

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

**IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT
IN A MANNER INCONSISTENT WITH ITS LABELING.**

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For the water in the pool, start with a test kit to determine the pH and the level of the sanitizer. The sanitizer should be maintained at 1.0 ppm available chlorine by weight.
A. Adjust the water pH to the proper range and maintain.
B. Add the sanitizer by a feeder device or by adding the sanitizer solution at a rate of 1.0 ppm available chlorine per day. For a 10 ppm sanitizer solution, 1.0 oz of the sanitizer per 100 gallons of water will provide 1.0 ppm available chlorine. The frequency of addition should maintain 1.0 to 1.0 ppm available chlorine. Adjust for temperature and number of swimmers. Use a test kit to determine the sanitizer level. The sanitizer level should be in the proper range.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
FOR HOME WELL WATER SYSTEMS**

Shake this sodium hypochlorite solution in the ratio of one part sodium hypochlorite solution to three parts filtered water. Mix 1.0 part hypochlorite solution and water thoroughly and begin filtering the solution with a hypochlorinator (metering pump). Maintain a free available chlorine residual of at least 0.2 ppm and no more than 0.6 ppm throughout the distribution system as determined by a DPD chlorine test kit. Bacteriological sampling must be conducted at a frequency no less than that prescribed by the local health or Primary Drinking Water Regulation. Check water frequently with a DPD chlorine test kit.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

Clean equipment in the normal manner. Just before using, rinse a surface thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with this disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Addition of one ounce (2.2 fl. oz.) of this sodium hypochlorite solution per 4 gallons of water will provide approximately 200 ppm available chlorine by weight.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage as necessary to obtain the required level of available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landfill. Product remains in the trash can. If used, should be diluted with water and disposed of in a sanitary sewer. Do not contain water. Do not feed by storage. Dispose of cleaning equipment.
