

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Provide one block per 15-20 head of cattle. Add an additional block when each block has been one-half consumed. Cattle should consume an average of 1/4 lb. of the block per 100 pounds of body weight per month. This will supply the recommended average intake of 70 mg. RABON Oral Larvicide per hundred pounds of body weight. Animals should not be starved for minerals before initiation of the RABON cattle Mineral Block program but OMIT all salt from other feed after the program is started. Do not feed free choice sources of salt or mineral containing salt in any form. Place near watering and loafing areas. Protect from rain.

If consumption of Golden Sun Hi Phos "12" Larvi-ban Block is above 1/4 lb. of the block per 100 lbs. of body weight per month, reduce the number of feeding locations or relocate. If consumption is below 1/4 lb. of the block per 100 lbs. of body weight per month, increase the number of feeding locations. Start feeding Golden Sun Hi Phos "12" Larvi-ban Block early in the spring before flies begin to appear, and continue feeding throughout the summer and into the fall.

Golden Sun Hi Phos "12" Larvi-ban Block may be fed up to slaughter and to lactating dairy cows.

Golden Sun Hi Phos "12" Larvi-ban Block prevents the development of horn flies, face flies, house flies and stable flies in the manure of treated cattle but is not effective against existing adult flies. When starting a feeding program during the fly season, it may be necessary to use other control measures to reduce the population of existing adult flies.

Supplemental fly control measures may be needed in and around cattle lots and buildings to control adult house flies and stable flies which can breed not only in cattle manure but in other decaying vegetable matter or silage on the premises.

In order to achieve optimum fly control, Golden Sun Hi Phos "12" Larvi-ban Block should be used in conjunction with other good management and sanitation practices.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL:

Pesticide that cannot be used according to label instructions must be disposed of according to applicable Federal, state or local procedures.

CONTAINER DISPOSAL:

Completely empty bag by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of bags in a sanitary landfill or by incineration if allowed by state and local authorities.

Golden Sun Hi Phos "12" Larvi-ban Block

(Contains RABON® Oral Larvicide)

NOT FOR HUMAN USE

**TO PREVENT THE DEVELOPMENT OF
HORN FLIES, FACE FLIES, HOUSE FLIES
AND STABLE FLIES**

IN THE MANURE OF TREATED CATTLE.

ACTIVE INGREDIENTS BY WEIGHT

2-chloro-1 (2, 4, 5-trichlorophenyl) vinyl dimethyl phosphate	1.8% *
INERT INGREDIENTS	98.2% **
TOTAL	100.0%

* Each pound contains 8.172 g RABON®
** Refers only to ingredients which are not larvicidal.
