

DU COR FORMULA 72 WEED KILLER is a non-selective weed killer effective for use on non-crop areas such as right-of-ways, industrial plants, lumber yards, storage areas, parking lots, on canal banks, around lakes and beaches, sand traps and roughs on golf courses, etc. It is effective against most annual and perennial grasses and broad leaved weeds. Effectiveness and length of control will depend on soil type, amount of rainfall and other conditions.

RATE: Under ordinary conditions cut at the rate of 1 part to 6 parts water. Two to five gallons FORMULA 72 will cover an acre or 43,500 sq. feet in 75 to 150 gallons of water. Use a coarse spray to avoid drift. Best control is obtained before weeds have reached heavy growth.

Net contents 1 gal.

Du Cor FORMULA 72 WEED KILLER

ACTIVE INGREDIENTS:

Monuron Trichloroacetate 3-(p-chloro-phenyl)-1,1-Dimethylurea Trichloroacetate	3.19%
Aromatic Petroleum Derivative	91.67%
Inert Ingredients	5.14%
Total	100.00%

CAUTION— Keep out of reach of children
For Additional Caution Information See Other Panel
DO NOT USE OR STORE NEAR HEAT OR OPEN FLAME

WHEN TO APPLY: Apply when grasses and weeds are small as better control is obtained. Rain or thorough wetting after application will cause material to move to root zone and speed up control. This material will not give a quick top kill but moves through the leaves of the plant to the root for thorough and more lasting kill.

NOTE

Do not apply, allow to drain, drift or flush spray equipment onto or near croplands, lawns, trees, or other desirable plants. Do not contaminate irrigation ditches or water used for domestic purposes. Do not allow contact with fertilizers, insecticides, fungicides, or seeds. Thoroughly clean equipment after use. Flush out container when empty then destroy.

CAUTION!

HARMFUL IF SWALLOWED

IRRITATING TO SKIN AND EYES

Do not get on skin, in eyes or on clothing. In case of contact, immediately wash skin with plenty of water; for eyes, wash with water for at least 15 minutes and get medical attention.
