			DIRECTIONS FOR USE GENERAL CLASSIFICATION
	·		It is a violation of Federal law to use this product in a manner in- consistent with its labeling.
	5260		J J
	JZUJ		5269 is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to
		· · · · · · · · · · · · · · · · · · ·	remove algal growth, microbiological slime, and other deposits. An initial slug ad- dition of 0.9 to 2.2 fluid ounces of 5269 per 1000 gallons of water to provide a
			concentration of 8 to 20 parts per million of 5269, based on the total weight of water in the system, is recommended. Repeat initial dosage until control is
			evident.
Ē			Subsequent slug additions of 0.2 to 2.2 fluid ounces of 5269 per 1000 gallons of water (2 to 20 parts per million of 5269) should be employed every 2 to 5 days, or
	ACTIVE INGREDIENT: Poly(oxyethylene (dimethyliminio) ethylene-		as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should
A.	(dimethyliminio) ethyleno dichioride]		be made in the sump of water cooling towers. 5269 is used to control bacteria in industrial air-washing systems that maintain
			effective mist eliminating components. Prior to its use, systems should be
5 50	This product contains 5 78 lb of patient instantion		cleaned to remove bacterial slime and other deposits. An initial slug dose of 3.33 to 5.55 fluid ounces of 5269 per 1000 gallons of water is recommended. Repeat
	This product contains 5.76 lb. of active ingredient per per gallon.	galion and weighs 9,6 lb.	initial dosage until control is evident. Subsequent slug additions of 2.25 to 5.55 fluid ounces of 5269 per 1000 gailons of water should be employed each 1 to 3
L			days, or as needed. The frequency of addition depends upon the relative amount of bleadoff and severity of the bacterial problem. Slug additions may be made to
