USE DIRECTIONS:

For light duty cleaning, sanitizing and deodorizing, use 2 ounces (1/4 cup) per gallon.

For heavy duty cleaning and disinfecting and fungicidal activity against pathogenic fungi, use 4.5 ounces per gallon.

For best results, use PEAK NO. 210 with a cloth or mop and apply to walls, floors and other hard surfaces. If used for sanitization of food contact items, limit the level to 200 ppm of quaternary (8 ounces (1 cup) per 5 gallons). A potable water rinse is required.

For extra heavy industrial cleaning and sanitizing, use a second application.

Do not mix with soap or anionic solutions.

PEAK NO. 210 is non-corrosive in use dilutions on inanimate hard surfaces.

PEAK NO. 210 is a heavy duty cleaner and disinfectant designed for general purpose use where heavy duty cleaning and sanitizing is of prime importance. When used as directed, PEAK NO. 210 will remove most household dirt and grime in a single, simple application. When used for industrial cleaning, follow the use directions shown on the left side panel.

Not recommended for Pseudomonas Aeruginosa.

For sanitization of food processing equipment or food contact items, limit the active quaternary to 200 ppm. A potable water rinse is required.
