

MICROBAN SANITIZER is recommended for use on hard (non-porous) surfaces, dishes, glasses or food processing equipment or utensils, including dairy and brewery equipment and utensils.

**DIRECTIONS FOR USE:**

Prepare a sanitizing solution by dissolving 1 oz. or 2 oz. of MICROBAN SANITIZER per 10 gal. water. This gives a solution containing 100 ppm or 200 ppm available chlorine respectively. Clean and rinse item or surface to be sanitized. Let stand 2-5 minutes of contact time for sanitizing dishes, glasses, food processing equipment and utensils. Clean and rinse items prior to sanitizing. After sanitizing step, rinse well with potable water and dry. The items are then ready for use.

The sanitizing solution should be used promptly after mixing. If the solution is allowed to stand or is reused and tests show the level of chlorine has not been maintained, additional MICROBAN SANITIZER should be added to maintain a minimum concentration of 100 ppm available chlorine.

**DIRECTIONS FOR STORAGE / HANDLING**

**WARNING**

**KEEP OUT OF REACH OF CHILDREN**

Store in a cool, dry, well ventilated area. Moisture contamination may liberate irritating and hazardous chlorine containing gases. Oxidizing material: Do not mix with other chemicals. Contact with organic matter may cause fire. In case of decomposition, if possible, isolate container in open air or well ventilated area. Flood with large volume of water if necessary. Do not reuse empty container. Rinse empty container thoroughly with clean water before discarding. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.
