

ALGI-GON

SP-80

Algae are unsightly, system-clogging plant life. The growth of algae in the water is promoted primarily by light and carbon dioxide.

**GOOD RIDDANCE TO ALGAE**

- Compatible with all pool filters.
- Filtering systems do not reduce the effectiveness of Laing's SP-80.
- Will not replace the need for chlorine for proper pH and sanitization, but does relieve the need for excessive quantities of chlorine to combat algae.
- Non-corrosive to pool filters, heaters, piping and fittings.

Mix required dosage in bucket of water. Pour into skimmer or distribute evenly around edge of pool. Water temperature of 80° F. or higher will give faster results. Laing's SP-80 is most effective throughout normal range of pool water pH.

**DOSEAGE**

One ounce of this package treats up to 40,000 gallons. To prevent algae growth the pool must be kept clean. Add one ounce (one package) per 4000 gallons. Repeat treatment every 8 to 10 days when algae appears.

First application must be made when algae is first visible. With the standard treatment of one package per 4000 gallons. After 7 days, repeat treatment if necessary. Repeat treatment every 8 to 10 days when algae appears.

The first application must be made when algae is first visible. With the standard treatment of one package per 4000 gallons. After 7 days, repeat treatment if necessary. Repeat treatment every 8 to 10 days when algae appears.

For the treatment of an algae-free pool, add one package per 4000 gallons of water.

1. To determine package quantity, multiply pool length x width x average depth x 5.9.

2. Do not use treated water on plants or grass as Laing's SP-80 and other pool additives could cause damage.

**ACTIVE INGREDIENT:**  
 Simazine (2-Chloro-4, 6-bis (ethylamine)-s-triazine) ... 80%  
**INERT INGREDIENTS ... 20%**

Manufactured for:  
 M.E. Parks Enterprises, Inc.  
 Rancho California Box 888  
 Temecula, Calif. 92290  
 A Product of:  
 Laing Chemical Co.

**ALGAE CONTROL**

*ALGAE IS GONE*
