

CPI "3888" air sanitizer is formulated and designed to be used in an automatic timing unit. The automatic timing unit should be located 7 feet from the floor where possible and directed into the center of the area being treated. One automatic timing unit will treat an area of 20 ft. x 30 ft. x 10 ft. (6,000 cubic ft.) The automatic timing unit should be set to actuate the CPI "3888" valve every 15 minutes. Each actuation of the special valve will provide 100 mgs of long lasting, tiny, particles of product. Within 24 hours of continued use, CPI "3888" will prove effective in control of odors, and highly effective in reducing air borne bacteria. To obtain adequate results, the product should be used in closed areas where there are no outside drafts.

ACTIVE INGREDIENTS:

n-alkyl (60% C14, 30% C16, 5% C12, 5% C18).....	0.1%
dimethyl benzyl ammonium chlorides	
n-alkyl (60% C12, 32% C14)	
dimethyl ethyl benzyl ammonium chloride	0.1%
Triethylene Glycol	6.0%
INERT INGREDIENTS:	93.8%

Contains Sodium Nitrite

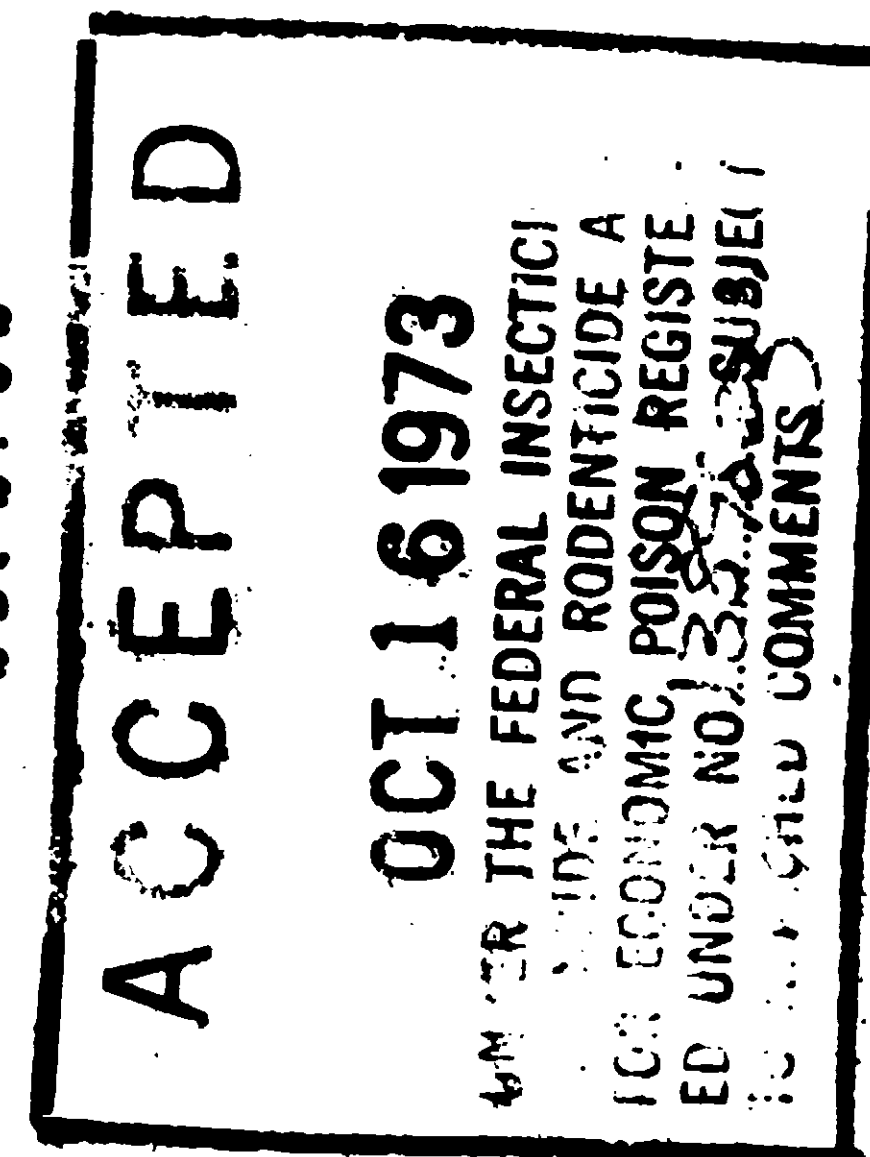

For Use in Hospitals, institutions, nursing homes, offices, schools, motels and hotels.

WARNING:

Flammable! Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.

Avoid spraying in eyes. In case of contact flush with water. If irritation persists, get medical attention. Avoid contamination of food. Do not install in nurseries or rooms where infants, ill or aged persons are confined. Do not install in areas where food is prepared or served.
