Active Ingredients

Pyrethrins	.033%
*Piperonyl Butoxide	.33 %
*(butylcarbityl) (6-propylpiperonyl) ether	
Related Compounds	.046%
Inert Ingredients	99.591%

Active ingredients above indicates residue after five months storage of IRT Sacks originally treated with 50 ± 10 mg/sq. ft. piperonyl butoxide, and 5 ± 1 mg/sq. ft. pyrethrins on the outer surface of the outer ply of basis weight 60 lb. per 3,000 sq. ft. ream. Treatment increases resistance to penetration by insects for a period of 9 to 12 months under normal shipping, handling and storage conditions. Tight end closures and specially designed longitudinal seam assist in protecting the contents, providing the sack is otherwise intact. For maximum effectiveness, IRT sacks must be filled within 5 months of the date of fabrication.

This product is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

Number of sacks and weight of contents _____

of _____ SACKS.

Date of Sack Fabrication _____

USDA Reg. No. 14981-1.

The outer ply of this shipping sack has been treated with synergized pyrethrins to increase its resistance to penetration by insects under normal shipping, handling and storage conditions. Tight end closures and specially designed longitudinal seam assist in protecting the contents, providing the sack is otherwise intact.

This product is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

This sack has been registered with the United States Department of Agriculture under USDA Reg. No. 14981-1.
