INSECTICIDE SPRAY FOR HORSES

DIRECTIONS FOR USE: For best results apply 1/2 to 1 oz. twice daily with a trigger type hand pumped sprayer. This method is fast and provides even distribution over the entire animal. Continue treatment even in wet weather. Treat all horses in stable.

Until the horse learns the value of 'Bye-Fly a cloth may be used to apply it. Dampen the cloth with the sprayer in the horse's presence to accustom animal to its sound. By pumping the trigger gently the hissing which alarms some horses does not occur. The horse will usually accept direct spraying after a few applications. Spray may be directed into gnat irritated ears and onto fly-caused skin irritations.

The routine of spraying twice daily should be followed regardless of weather to achieve maximum fly reduction.

CAUTION: KEEP OUT OF REACH OF CHILDREN. Harmful or fatal if swallowed. If swallowed, do not induce vomiting. Call a physician immediately!

DO NOT STORE NEAR AN OPEN FLAME
Avoid contamination of feed or foodstuff. Do not wet the skin of animals. Wash hands with soap after applying.

DO NOT REUSE CONTAINER • DESTROY WHEN EMPTY
