Cat flea collar

Cat flea collar

Cat flea collar

Isolated Insecticide Collar.
Kills Fleas on your Cat for 3 months.

COMPOSITION: ACTIVE INGREDIENTS:

2,2-dichlorovinyl dimethyl phosphate	18.6%
(this ingredient statement applies to the DDVP resin strip inside the collar)	
Related compounds	1.4%

INERT INGREDIENTS:	80.0%
--------------------	-------

Total	100.0%
-------	--------

This Collar is a real Collar which gives your Cat protection against Fleas. The insecticide is isolated from the skin of the animal. Since the insecticide evaporates through holes in the collar towards the outside of the neck of the animal, it provides no direct contact between the insecticide and the animal. The Isolated Insecticide Collar does not necessitate that the housewife or children touch the insecticide, as it is only found on the inside of the Collar.

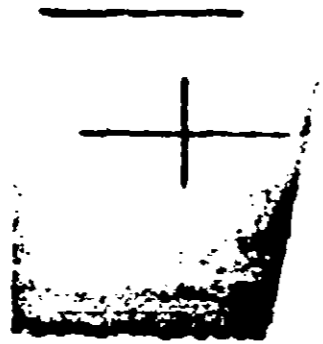

DIRECTIONS FOR USE: Open the envelope and fasten the Isolated Collar around the neck of the Cat. Cut off any excess band. Cats occasionally object to wearing a Collar. Fleas are killed as soon as the Collar is in position, and new ones will also be killed. The Isolated Collar lasts up to 3 months. Replace when effectiveness diminishes.

CAUTION: Do not open inner envelope until ready for use. Collar is intended for use only as an insecticide generator and is not to be taken internally by man or animals. Animals should not be allowed to chew on the Collar. The insecticide in the Collar is isolated with no contact direct to the skin. Thus, it generally avoids any skin irritation. If skin irritation should occur, remove Collar at once. Do not use on Persians. Do not use on sick or convalescing cats. Do not use any other pesticide on Cat while Collar is worn.

Manufactured and distributed by **ARKOVET** Laboratories,
06100 Nice, France - EPA Reg. N° 15577-3
