Cross-contamination is of major housekeeping concern not only in hospitals, but in schools, institutions, and industry. Troy 1622 is formulated for this problem area. It both cleans and disinfects effectively and is virucidal when used as directed. Its hard surface disinfecting action will reduce the hazard of cross-contamination from environmental surfaces.

When used as directed, Troy 1622 will deodorize toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas, and other places where bacterial growth can cause malodors. Prevents odors caused by mold and mildew.

This product is economical to use because it is highly concentrated and should be handled with care.
