**PRECAUTIONARY STATEMENTS**

**Hazards to Humans & Domestic Animals**  
**DANGER**—Corrosive, causes eye damage and skin irritation. Do not get in eyes, on skin or clothing. Wear goggles or face shield, and rubber gloves when handling. Harmful if swallowed, inhaled or absorbed through skin. Avoid inhalation of spray mist. In case of contact, immediately flush eyes or skin with plenty of water. If in eyes, see a physician. If irritation develops, get medical attention. Wash contaminated clothing before reuse. Do not contaminate feed or food.

**Environmental Hazards**  
Keep out of lakes, streams and ponds. Do not apply when weather conditions favor drift from target area. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not contaminate domestic or irrigation waters.

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**STORAGE & DISPOSAL**

**— KEEP FROM FREEZING —**

**Prohibitions:** Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Do not store near other pesticides or seeds.

**Pesticide Disposal:** Pesticide, spray, mixture or rinsate that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies.

**Container Disposal:** Triple rinse (or equivalent) and offer for recycling, reconditioning or disposal in approved landfill, or bury in a safe place.

**General:** Consult federal, state or local disposal authorities for approved alternative procedures.

**OTHER USE PRECAUTIONS:**

Avoid drift of spray mist to vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants. Do not pour spray solutions near these plants. Coarse sprays are less likely to drift away from target area. Clover present will be damaged if sprayed.

**ROADSIDES, DRAINAGE DITCH BANKS, RIGHTS-  
OF-WAYS & OTHER SIMILAR NON-CROP AREAS:**

To effectively control brush, all leaves, stems and suckers should be thoroughly wet to the ground. Apply **Feed 4-41 Brush Killer** when plants come into full leaf (spring, in the time plants begin to go dormant). Best results are obtained when brush and weeds are young and actively growing. Do not cut brush or weeds until the herbicide has translocated throughout the plant causing root death.

**HIGH VOLUME**—Use **Feed 4-41 Brush Killer** at the rate of 1 1/2 to 2 gallons in water to make 100-300 gallons of spray per acre. The amount of water used must allow for full wetting of plants. For small broadleaf weeds, use the lower rate. Heavy dense stands of brush require the high rate with high water volume.

**LOW VOLUME GROUND or AERIAL FOLIAGE SPRAY**—Use **Feed 4-41 Brush Killer** at the rate of 1/2 to 2 gallons in water to make 15-25 gallons of spray per acre. Use enough water to insure uniform wetting of plants.

**NOTE:** Avoid spray drift to sensitive crops. Where necessary, use nozzles which produce large spray droplets that greatly reduce spray drift. Use of thickening agents or anti-drift additives and drift-reducing equipment is of value in preventing spray drift. Care should be taken not to make applications where run-off could contaminate bodies of water or spray drift could carry the chemical to food crops or grazing land where cattle, sheep, goats, swine or poultry would be exposed.

**BRUSH & WEEDS CONTROLLED:**

**Feed 4-41 Brush Killer** is especially effective against brush such as Ash, Birches, Brambles, Kudzu, Multiflora Rose and Willows. In addition to these, it kills many species of brush and broadleaved weeds, some of which are listed below.
